Sheep-Sheep and lamb receipts were sneep—sneep and lamb receipts were moderate. Opening trade was active. Considering the severe weather there would have been an early clearance had there been no delay in getting the arrivals to the barn. Values looked steady to stronger in spots, nothing toppy on fat lambs turning on the early market. Medium lämbs sold at 316.75@16.50, with heavy kinds turning at \$16.25@16.50. Prospects were good for an upturn all along the line on the close. Sheep supply were liberal and firm. of oats and eight of rye.

All of the coarse grains were sharply higher selling at a fair advance over those sold yesterday. Cash corn was generally 1#3c higher, while a few odd cars brought about yesterday's figures. The demand for this cereal was somewhat slower and this made the market a source of demand the market as a somewhat slower and this this cereal was somewhat slower and this made the market a sort of draggy affair, while buyers and sellers differed in many instances 2 and 3 cents and therefore were unable to trade. The market on the whole was anything but active, a good part of the offerings eventually being disposed of. No. 4 white sold at \$1.63@1.68 and No. 5 white at \$1.60. No. 3 yellow sold at \$1.65 and No. 4 yellow at \$1.54@1.60, while the No. 5 grade went at \$1.43@1.82. No. 3 mixed brought \$1.62 and the No. 4 mixed \$1.65. No. 5 mixed ranged from \$1.42 to \$1.47.

Oats showed reaction, gaining their loss of yesterday, the spot on this cereal being quoted \$6 to up. Traders are interested in reports that the administration would oppose the proposed amendment to the senate bill to take the railroads out of federal control a year after the war. Trade in this grain was light, this cereal being in much the same position as corn, buyers being seemingly satisfied for the present. Standard oats sold at \$5 1/2 c and the No. 3 and No. 4 white at 85c. One car of sample grade brought 84c. Rye and barley were strong, the former advancing 3c and the latter 2c. with a ready market for either. Millers of late have market for either. Millers of late have taken all the rye they are able to lay hands on and have paid fancy figures to get it. No. 2 rye sold at \$2.12 and the No. 4 grade of barley at \$1.55. Arrivals of both these cereals were extremely light and entirely insufficient to supply the buyers' wants.

Clearances were: Wheat and flour equal to \$24,000 bushels; corn, 1,000 bushels; cats, none.

Primary wheat receipts were 311,000 bu.

Then the prospect that eastward progress of the storm would bring about more or less complete traffic blockade all the way to this city, turned prices in favor of the bulls.

Shortage of immediate supplies together with chances of further tightening of conditions had much to do with holating the value of oats. There was some seaboard inquiry.

A big falling off in hog arrivals lifted provisions. In addition it was said there had been liberal buyl.g for export.

TAG YOUR SHOVEL **GUIDES OFFICERS** IS WATCHWORD CF TO DOPE JOINTS **ENTIRE COUNTRY**

School Children of Nation Join in Campaign to Save Fuel to Help Win the War.

Yesterday was "Tag-your-shovel day," a nation-wide movement advocated by the United States fuel administration.

Throughout the United States today 20,350,000 school boys and girls Superintendent Beveridge omes. sent supplies of official tags to the schools for distribution to the chil-

wise tagged by a boy of Park school Save a Shovelful.

These tags are to serve as reminders to those who attend furnaces and day.

The following statement was issued

by the publicity department of the federal fuel administration: "See that tag! Well, it is not only going to help the man or woman who makes the domestic fire to visualize the nation's coal needs, but it will also help the boys and girls to do the

same. "The United States fuel administration and the educators of the country are planning an object lesson in pa-

triotism for the schools. "This tag day will place the children in direct contact with the world forces now warring in defense of their homes. And the agency, the will constantly remind the man and the woman behind the shovel that Uncle Sam needs that extra shovel-

tag." Mayor Dahlman, Superintendent Beveridge and other officials of the city, county and state have declared their intentions of saving one shovelful of coal each day in their homes.

Coolness Better Than

Purity in the Air The New York State Commission on Ventilation has for nearly four years been experimenting in an effort to find what good ventilatio. really is. Specially fitted up rooms and more than two hundred persons have been sed in these experiments, the expense of which was paid by the New York Association for Improving the annual battle for the throne. the Condition of the Poor, and a jury of specialists has passed upon them.

Some of the interesting and unforeare described in the Popular Science important of these is that "so long as the room was kept cool and so long as the temp nature was ...ct allowed to rise it did not make much difference whether or not a plentiful supply of fresh air was supplied to the

chamler. "Even when the subjects spent six days in succession in the unaired chamber, breathing air that contained the accumulated products of the breath, they did as good menta! work, felt just as happy and did as much physical work as they did when the ventilating fans were constantly changing the air. Furthermore, the most careful observations of the heart and circulation and the general condition of the body failed to show any harmful effects. The only indication of any depressing effect of breathing this confined and several times used air was that about 5 per cent less food was eaten."

The lesson to be learned from this is that we should not allow our living rooms to be heated to more than 68 degrees Fahrenheit. Fifteen per cent less work can be done at 75 than at 68 degrees.-New World.

The most his brethren charged a powerful bull. pretender to the throne, younger and more agile, but several pounds lighter

than the patriarch. Straight toward Hiawatha came the challenger! Straight at the challenger charged the king, with lowered head.

Halfway between the two groups the warriors met with a clang of antlers that echoed through the gorge. For 30 minutes, with horns locked, they battled back and forth. Each was trying for that energetic twist of head and neck that would throw its rival to the ground. Had either been successful in this, it would have tried to gore its adversary to death.

But neither battler was able to get in the death thrust. For a time it seemed as though the challenger would win. It backed the patriarch against the wire fence of the paddock. Then the skill born of many previous battles came to the old master's aid In the parlance of the prize ring, Hiawatha soon had the ambitious youngster groggy. With a sudden lunge he pushed the challenger back 50 feet. Three times he nearly succeeded in felling him with clever twists of horns and head. Three times the challenger saved himself in the nick of time. After the last escape the youngster. aware that he was beaten, scampered

headlong down the gorge. Bugling defiance and scorn at the worsted rival. Hiawatha returned to the herd. The other bulls, true to elk nature, timidly joined him, deserting their late champion .- Minneapolis Journal.

Railroads to Let Out Their Right-of-Ways to Farmers Lincoln, Neb., Jan. 30.-Railroads

in Nebraska have agreed to continue this spring the plan adopted last year of letting out their right-of-way to responsible parties for farming purposes. This information is conveyed to Director C. W. Pugsley of the extension serivce in letters from the presidents of the different lines operating in the state. First choice will be given to farmers

with land adjacent to the railroad. First choice of the right-of-ways in towns will of course be given to railroad employes. Application should be adem to the local railroad agent who will forward the request to the proper authorities. It has been asked that hotse desirous of using the railroad property make early application.

today. Take, for example, the one about the Black Hole of Calcutta. Every schoolboy and nearly every grown-up person is familiar with the details of that ghastly story. It relates how the Nabob Suraja Dowlah shut up 146 Britons, captured by him in Calcutta Fort, in a small, unventilated dungeon, and how, after a night of agony from heat, thirst and lack of air, only 23

has been implicitly believed. Yet now along comes Mr. Little and proves in his "Bengal: Past and Present," not only that it is not true, but that it could not possibly be true. Nine persons only were, it appears from contemporary records, confined in the "black hole," which was really the common prison, and none of these suffered any very great inconvenience. The remainder of the garrison, num-

ter were treated by their conquerors with every consideration.
