EVER-TEL, the World's Greatest Hair Restorative, heralds joy and happiness everywhere! It is clean, simple, scientific. It gradually darkens the premature gray hair of youth, and modestly corrects the ravages of approaching age. It does its work positively, yet so gradually that even your own friends can "Never-Tel"—that's why it was legally accorded the rame Never-Tel. It is not sticky, and will not stain the most delicate akin. It invigorates the scalp; eliminates dandruff, and stimulates the hair to a more luxuriant growth. It is a perfect delight to modest, refined women who have experienced the disagreeable features of other preparations; and to all who have felt the tragedy of grayness, Never-Tel. comes as the one safe, sanitary preparation to restore the natural, lustrous color; place the glow of youth upon your cheek, and social confidence at your command.

Born in a College Laboratory!

The primative thought leading to the discovery of Navas-Tat. came from a college student—a young man who was prematurely gray. He had often been distressed by the une of different kinds of hair preparations. He was a student of chemistry and for five years made one experiment after another on his own account. He conferred with professors, and submitted test after test. Natural hair of every kind was used, and the combination of chemicals that gave the positive, gradual derkaring without state to the side was adopted—its own heautiful work suggesting the name, which is now legally known everywhere as Nevez-Tet. Valuable treatise on the hair in every 50e box at all druggists.

Author, and others give valuable advice and information on the use of organic from as a tonic, strength and blood builder.

Careful investigation by designated physicians among druggists and patients has revealed the fact that there are thousands of people taking from who do not distinguish between organic iron and metallic iron, and that such persons often fall to obtain the vital energy, strength and endurance which they seek, simply because they have taken the wrong form of iron. They seem to think iron is iron on a good deal the same theory that a potate would be a potate whether cooked or raw, entirely ignoring the fact that the cooking process makes certain important cellular changes in the potate that renders it far more easy of assimilation by the blood and tissues. No one would hardly expect to derive the same strength from eating cocked potatoes, yet, according to the opinions of some physicians who have made as tudy of the subject, taking raw, unprepared, metallic iron is somewhat like eating raw potatoes.

At the use of organic from persons of one year after year suffering from pursues and a highly nervous condition, due to lack of sufficient iron in five red blood corpuscies without ever realising the real sand true cause of their trouble. Without iron in your blood your food merely passes through the body, something like corn through an old apart that the mi "But in my strong, vigorous,

Therefore, physicians mentioned below advise those who feel the need of a strength and blood brilder, to go to their family doctors and obtain a prescription calling for organic iron—Nuxated Iron—and present this to their druggist so that there may be no question about obtaining the proper article. But if they do not wish to go to the trouble of getting a prescription for Nuxated Iron then be sure to look on the label and see that the words NUXATED IRON are printed thereon. Not Nux and Iron are any other form of iron, but NUXATED IRON.

The remarkable results produced by Nuxated Iron and its widespread sale (it being estimated that over three million people annually are today using it, has led to the offering of numerous substitutes and these physicians say that health officials and doctors everywhere should caution the public against accepting substitutes in medicines, and they especially warn against accepting substitutes for Nuxated Iron, which instead of being organic iron may be nothing more than a metallic iron a compound.
