Corn Averages Higher Owing to Accumulation of Reserve Stocks.
Chicago, Ill., Feb. 18.—Corn averaged higher today owing more or leas to efforts to accumulate reserve stocks here before close, however, was unsettled. Much 11.27% and May 11.26%, with the final or cange igc off to a like advance compared with Saturday's latest figures. Oats arise of 7 cents.
Despite big increase of arrivals, the corn arrivals the entire scassion. It was realized that a short time remains until spring work by producers might sharply restrict the crop movement. Predictions of storry within the next 35 hours emphasized builts sentiment, and so too did the state of a rives. 215 11 50 155 18 00 750 10 25 924 10 50 Hogs-Receipts of hogs were only fair

today and the market opened with both packers and shippers buying hogs at prices that were 20@35c higher than the close lase week. Trade, was active right from the start. Shippers were picking the light weight hogs showing quality, and trade on this class of stuff hus been active the last the crop movement. Predictions of stormy weather within the next 35 hours empha-sized builish sentiment, and so too did the fact that as high as \$2 a bushel had been paid for extra good white corn suitable for milling. Near the end of the day, though, prices tended somewhat to relax owing to assertions that 100,000 cars had been concentrated in the middle west and that a daily movement of 4,000,000 to 5,-000,000 bushels was on. Oats ascended to new top records for the season. Urgent bidding from the west was chiefly responsible. few days. Best price paid was \$16.55, 25c higher than was paid Saturday, while the bulk of the offerings moved at \$16.75 \$16.45.
