OWNER OF DAIRY FARM CONVICTED ON BOOZE CHARGE

Anton Larson Found Guilty in District Court of Illegal Possession of Liquor: Raided by Sheriff.

Anton Larson, West Center street dairyman whose farm was raided by Sheriff Clark and deputies shortly after the prohibition law went into effect, was found guilty in district court Saturday morning of illegal possession of liquor. The trial was conducted before Judge Estelle without a jury by agreement between at-torneys for the state and defense.

Eleven thousand bottles of beer and hundreds of gallons of whisky were found in Larson's possession, stored in caves and dug-outs in the neigh-borhood of his dairy on Center street road. The dairy farm was raided by deputies from the office of Sheriff Clark. Larson said he was storing the liquor for a saloon man.

The Larson case was the fourteenth tried by Special Prosecutor McGuire within the last two weeks. He was assisted by Deputy Prosecutor Ram-

Convictions in liquor cases pros-ecuted by McGuire are falling thick and fast at the hands of the jury now empaneled. Of the 14 cases tried during the last two weeks 11 have

McGuire has another charge pend-ing against Larson under the prohi-bition law.

Seedsmen to Sell Only

While it is rare for experts in any line to agree, the men who speak with ket could not be expected to give authority about potatoes seem to be the same results as tubers grown, of almost one mind, that no matter housed, and prepared for seed.-New how many eyes a potato seed has only one of them will make a sturdy, worth-while plant. And it is well that the authorities have come into at least the zone of agreement, for the potato growers are far from unani-mous. Some still stick to the ancient Irish method of planting a whole potato, some make two seeds of a po-tato, others cut for two eyes, and still and asks for the restoration of her others make as many seeds of a spud maiden name. as it has eyes.

settle the matter definitely, made a Bertha Storz. She is the daughter of series of experiments running through | Charles Store, 1901 Wirt street, and five years. Four acres of land were divided into as many fields, and all fields were treated identically in the matter of fertilizing, cultivating, spraying and harvesting. One acre was planted with whole potatoes, one with helf contracts of the street, and niece of Gottlieb Storz. Hart is the son of John H. Hart. Both are of prominent Omaha families.

Young Hart is now with the Omaha ambulance company at Louiswille, Ky. with half potatoes, one with two eyes to a seed, and one with one-eyed seed. At the end of each season the weight

Body of Veteran Engineer At the end of each season the weight and cost of each sort of seed were computed, along with the weight of marketable and cull potatoes produced on each acre. The one-eyed seed was found to have given the Eighteenth street, Friday night, will duces pressure on the nerve.

LARGE SALARIES FOR SWIFT FAMILY

From Louis, Who Draws \$65,-000, Down to Harold, With \$15,000, They All Collect a Slice.

Chicago, March 2.-Further testimony in support of the contention of the big packing companies that it is impracticable to change from a ten to an eight-hour day because of the lack of necessary tankage and cooling facilities in the present plants was given today in the wage arbitration proceedings before Federal Judge Alschuler.

In concluding the cross-examina-tion of Chester S. Churchill, advisory superintendent of Swift & Co., Frank P. Walsh, attorney for the unions, read a list purporting to give the yearly salaries of some of the officers yearly salaries of some of the officers of Swift & Co. The list was, in part: Louis F. Swift, president, \$65,000; E. F. Swift, \$40,000; C. H. Swift, \$20,000; L. A. Carton, \$27,000; F. S. Haywood, \$20,000; G. F. Swift, jr., \$20,000; F. A. Fowler, \$15,000; Harold Swift, \$15,000; A. P. Collins, \$15,000; C. T. Pryor, \$20,000; William Leavitt, \$15,000.

Mr. Churchill said he had never considered the cost of living in connection with the fixing of wages. He said Swift & Co. recently engaged an economist to study these questions. Four Holidays.

He said the firm observed four legal holidays-Fourth of July, Labor day, Thanksgiving day and Christ-mas. New Year's and Memorial day, he said, were observed when possible, the men seldom being compelled to work more than half a day on these occasions.

Mr. Churchill testified that no Sunday work was ever done except in case of greatest emergency. The company, he said, had a rule against (Article No. 16.)

Chiropractic Talks

ART OF CHIROPRACTIC

Speaking of Chiropractic as an art, we deal with the practical application and demonstration of the knowledge of relieving human suffering, the location of the point where the nerve is undergoing pressure, then tracing its course from cause to effect or from effect to cause, and adjusting the subluxated vertebra which produces pressure on the nerve.

opening in it for the spinal cord to have passage through, known as the spinal foramen. Then by placing two vertebrae in their normal position you will notice a small opening on either side. This opening is known as the intervertebral foramen and its purpose is to transmit (for the passage) the spinal nerves which branch off from the spinal cord. There are 31 pairs of these small openings in the normal spine, one pair between each pair of vertebrae and an equal number of spinal nerves branching off from the spinal cord passing through these openings. After they begin to divide and subdivide these nerves emerge from the spine until they reach all

begin to divide and subdivide these nerves emerge from the spine until they reach all parts of your body so that you can't prick your skin with even the finest needle without touching some of them.

Now, as long as these spinal bones remain in their normal position the intervertebral foramen (small openings) through which the spinal nerves pass, will also maintain their normal size and the nerves pass through without being pinched or interrupted, but a subluxation of one or more vertebrae will reduce the size of the intervertebral foramen, thereby producing pressure on the nerve and shutting off the life current passing from the brain to all parts sure on the nerve and shutting off the life current passing from the brain to all parts of the body. This is the primary cause of all disease and diseased organs. For ex-ample, each nerve as it leaves the spine carries 100 per cent of life current when normal, but should a subluxation produce 50 per cent of pressure on the nerve it would carry only 50 per cent beyond the subluxation when it is impinged, and the organs and muscles depending upon this nerve for their supply of life will become paralyzed and inactive and unable to elim-inate the waste matter from the affected paralyzed and inactive and unable to eliminate the waste matter from the affected parts, and deposits of dead matter take place which makes a favorable condition for the germs to live and multiply and diseases of all description possible. Thus it is understood that germs are not disease producers or the cause of disease, but are there only as scavengers and in most cases. ome a necessity rather than a de-

stroyer.
Chiropractors have good results in chronic Chiropractors have good results in chronic cases, yet it is in acute cases that they get quick results and sometimes results that seem almost miraculous. In cases of fever and inflammation it is seldom that more than five or six adjustments are necessary.

Adjustments give splendid results in the following abnormal conditions, called diseases: Appendicitis, pneumonia, lung fever, typhoid fever, goiter, asthma, "female diseases" tonsilitis, membranous croup, kidney, stomach and bowel troubles.

Health is simply a matter of turning on the vital forces, People are never too young to be adjusted. Infants four days old have been adjusted by Chiropractors. Splendid results have been had with babies and young children. Do not think Chropractic is not good for your particular case. The chances

results have been had with babies and young children. Do not think Chiropractic is not good for your particular case. The chances are 99 out of 100 that it is.

If you are sick and not prejudiced investigate this wonderful science. Don't say it is impossible. That's what they told Marconi. Edison and the Wright brothers.

It is easy for a well person to be happy. The sick suffer and there is very little chance to smile and be happy when suffering pain and when one feels depressed through sickness. There is hope in Chiropractic for the sick. Thousands are being restored to health through Chiropractic Adjustments. Should you consult a Chiropractor it might result in your finding the health you have vainly sought for. Science is always on the move. Don't dismiss the science of Chiropractic with only a passing thought. Investigate its merits. Let it be known to your nearest Chiropractor that you want more information and same will be forthcoming. Information costs nothing. A few adjustments will ne doubt convince you that Chiropractic will remove the cause of disease and put you in possessioon of good health. If you are afflicted in any way look up the Chiropractor.

Chiropractors adjust the spine and release pinched nerves. Let the patient do his part. Nature will do the rest and good health will result.

Next Sunday, Article No. 17, "Chiroealth will result.

Next Sunday, Article No. 17, "Chire practic for Lumbago," will be printed. Soldiers may secure adjustments free contarge from any Chiropractor. Names of the prominent Chiropractors the following listed cities:
