BARUCH IS GIVEN WAR TIME POWER

Head of War Industries Board Has Increased Authority Over Industries.

BARNARD M. BARUCH.

New York, March 6.—Reorganization of the war industries board, with Bernard M. Baruch of New York as chairman and with vastly-increased powers to control the output of American industry during the war, was announced today by President Wilson.

Final determination of all questions of priority in delivering to any department of the United States government, and to all allies, is vested in the board and it is charged with co-ordinating and anticipating the needs of any of these, creating or improving facilities for production and advising as to prices.

Much of the power is given to the chairman with the board acting in an advisory capacity, and he, the president says, should "act as the general eye of all supply departments in the field of industry."

NEW YORK WOMEN CAST FIRST VOTE SINCE FRANCHISE

"Baby Carriage" Brigade Plays Important Part in Congressional Election; Few Foolish Questions.

New York, March 6.—New York since they won the right at the polls last November. It was significant that they cast 31,858 votes out of a total of 78,192 in the four districts. They voted early, seeming to have made up their minds what they were going to do before they received their ballots, and they asked few "foolish women had their first chance to vote questions."

DEMOCRATS SELECTED.

In all the districts the democratic nominees were elected over their republican opponents by comfortable margins. The most surprising feature was the fact that in the 22d district, which includes part of the borough of the Bronx, the vote cast for the socialist candidate exceeded by approximately 700 that given the republican nominee. The socialist vote in other districts was negligible.

The only other district which had a woman candidate was the 21st. Mrs. Mamie Colvin ran on the prohibition ticket. Her vote was 328 out of a total of 23,928.

WOMEN CAUSE INTEREST.

In none of the districts was there any special issue involved except that of party politics. Chief interest centered in "the baby carriage vote." The results indicated that a majority of the women who took the trouble to register so they could cast their ballots were guided largely by the politics of their husbands or male relatives. All the districts are normally democratic.

Election officials who had predicted that the advent of women as voters would slow up the election machinery professed to have been pleasantly surprised. Many of them declared the women acted more intelligently and voted more expeditiously than the men. Many of the new citizens were accompanied to the polling places by their husbands and not a few of them trundled baby carriages. A few women were challenged because they were the wives of unnaturalized aliens and had registered without knowledge of the law which provides that a woman must assume the nationality of her husband, although she may have been born in the United States.

Suffrage workers attributed the intelligence displayed by women voters to the fact that they had been given careful instructions for the last 10 days.

Control of the house of representatives was regained by the democrats when they elected their candidates from four districts in Greater New York at a special election called to choose successors to four members of that party who had resigned their seats in congress.

The successful candidates were: Seventh district, Kings county, John J. Delaney, to succeed John J. Fitzgerald.

Eighth district, King county, William E. Cleary, to succeed Daniel J. Griffin.

Twenty-first district, New York county, Jerome F. Donovan, to succeed Murray Hulbert.

Twenty-second district, New York and Bronx counties, Anthony J. Griffin, to succeed Henry Buckner.

Submarine Destroyers

Our destroyers and scout ships are waiting for the sudden attack or the deadly torpedo—the watch on the Atlantic is on the lookout for the first indication of hidden danger—it's a fight for life. For those leading a quiet life at home it is often the unexpected that happens. It may be that we are mysteriously attacked by pain in our back or limbs, lumbago, "neuragic" pains—shooting anywhere. Backache of any kind is often caused by kidney disorders, which means that the kidneys are not working properly. Poisonous matter and uric acid accumulate within the body in great abundance, overworking the sick kidneys; hence the congestion of blood causes backache in the same manner as a similar congestion in the head causes headache. Perhaps you become nervous, despondent, sick, feverish, irritable, have spots appearing before the eyes, bags under the lids, and lack of ambition to do things. The latest and most effective means of overcoming such trouble, is to eat sparingly of meat, drink plenty of water between meals, and take a single An-uric Tablet before each meal for a while, or until recovered.

Simply ask your favorite druggist for Anuric Tablets (double strength). If you have lumbago, rheumatism, gout, dropsy, begin immediately with this newest discovery of Dr. Pierce, who is Chief Medical Director of Surgical Institute in Buffalo, N. Y. Send 10c for trial pkg. All druggists sell large package for sixty cents.

Dr. Pierce's Pellets regulate and invigorate stomach, liver and bowels. Compound of May-apple, aloes and jalap. Keep the body clean inside as well as outside.

DEFENDS SALARIES PAID HOG ISLE HEADS

Says General Manager Might Have Been Secured for Less Than \$25,000 Per Annum.

Washington, March 6.—Salaries paid officers of the Hog Island ship yard by the International Shipbuilding corporation, which has a contract for building 120 fabricated steel ships with government money on a commission basis, were defended before the senate commerce committee today by Dwight P. Robinson, president of the corporation. He was the first of several officials who will present the company's side of the Hog Island controversy, and will continue his testimony tomorrow.

Were Vaulable Men.

Many of the yard's officers were employed by the Boston engineering firm of Stone & Webster before entering the employ of the International corporation, and Mr. Robinson told the committee that in the cases of such men the increased salaries they now receive represent what they would have been paid by Stone & Webster had they remained with that firm.

Under questioning he said that possibly the yard's \$25,000 a year general manager might not have gotten that much from the Boston concern, but added that all of the salaries were approved by the shipping board.

In justifying other salaries, including approximately \$2,000 a month to publicity men, Mr. Robinson said capable men could not be retained for less money. The publicity men, he said, were employed to aid in a campaign to impress upon the public the necessity for building merchant ships.

Sunday night Zeppelins were observed at Gatchina, 35 miles from Petrograd, flying toward the capital, but they were driven off by the anti-aircraft batteries.

Win the War By Preparing the Land, Sowing the Seed and Producing Bigger Crops.

Work in Joint Effort the Soil of the U. S. and Canada—Co-operative Farming in Man Power Necessary to Win the Battle for Liberty. The Food Controller of the United States and Canada are asking for greater food production. Scarcely 100,000,000 bushels of wheat can be sent to the allies overseas before the crop harvest. Upon the efforts of the United States and Canada, rests the burden of supply. Every Available Tillable Acre must contribute. Every Available Farmer and Farm Hand must assist. Western Canada has an enormous acreage to be seeded, but man power is short, and an appeal to the United States allies is for more men for seeding operations. Canada's Wheat Production last year was 225,000,000 Bushels; the demand from Canada alone for 1918, is 400,000,000 Bushels. To secure this she must have assistance, she has the land, but needs the men. The Government of the United States wants every man who can effectively help to do farm work this year. It wants the men in the United States developed first, of course, but it also wants to help Canada. Whenever we find a man we can spare to Canada's fields after ours are supplied, we want to direct him there. Apply to our Employment Service, and we will tell where you can best serve the combined interests. Western Canada's help will be required not later than April 15th. Wages to competent help, \$50 a month and up, board and lodging. Those who respond to this appeal will get a warm welcome, good wages, good board, and find comfortable homes. They will get a rate of one cent a mile from Canadian boundary points to destination, and return. For rail fares as to routes, and places where employment may be had, apply to U. S. Employment Service, Dept. of Labor.
