the human machine works: Experts in office management have peace, and such other courts, inferior devised special schemes of office to district courts, as by law may be routine. Each check is typed individually and a government law provides that checks also must be signed individually rather than samped mechanically. The signing is a big task. Signature duplicating machines are used, 10 checks being signed by each original signature of a pay clerk.

Even the choice of pay clerks is a lesson in efficiency. Not personality, not training, but length of patronymic names is the determining factor. Men with short names work at the signing machines, for more short names can be signed daily than long names. This is the reason the jobs are held by E. Hibbs, D. Mills, J. L. Betz, G. A. Ball and M. Cox.

The supreme court elects a clerk, who serves also as official reporter and librarian, and has deputies, clerks and assistants in each of his three departments. Each member of the ourt has his own clerk, most of whom now are former practitioners and members of the bar, law students or specially trained legal stenog-raphers and clerks. The court has at its command a law library of over 70,000 volumes, commonly known as the "state library," which affords ac-cess to all of the adjudicated cases of courts of last resort, commissions and miscellaneous tribunals throughout the United States, Canada and practically every foreign nation.
