

# AMERICA TO SEND 200,000 FIGHTERS ABROAD MONTHLY

### Conferences Held to Determine Number Needed During Year; May Call 1,600,000 Men.

Washington, April 3.—(Special Telegram.)—Draft officials conferred today on possible extensive changes in the plans for drafting men for the year 1918 as a result of recent orders for the rushing of men from the national army and national guard camps to France.

Although the original plans called for the induction of only 800,000 men into the service this year, it is possible that this number may be sent across as fast as shipping is available for the men.

### DETERMINE NEEDS OF YEAR.

Conferences between draft officials and representatives of the general staff have been held in the last few days to determine just how many men will be needed this year as a result of change in plans and to determine when they will be needed.

There are now almost 1,000,000 men in the training camps in the United States, and it was the original plan to send approximately 800,000 of these to France this year, replacing them as they left week by week with increments of newly drafted men, equal to the number of troops taken away from the camps.

Even this schedule, calling for the sending of something like 60,000 men a month to the front, was in excess of what the military authorities thought could be sent to France without a radical improvement in the shipping situation.

### 200,000 Per Month.

Under the new plan of speeding up, it is understood, that a major part of the 1,000,000 men in this country will leave the country by August 1, making it necessary to send something like 200,000 men a month or more if the schedule is to be carried out.

This will make necessary the radical change in plans for drafting men this year, which the provost marshal general's department is now considering, the object is to keep the army camps accommodating about 1,200,000 men, as full as possible, and to that end it may be necessary to send approximately 800,000 drafted men to camp by August 1.

This will mean an average of 200,000 drafted men each month, and since the present plan calls for a much less number, the provost marshal general's department is now trying to work out a new schedule.

## SOCIALISTS FALL FLAT IN CHICAGO MUNY ELECTION

Chicago, April 3.—Socialist candidates and those representing the Mayor Thompson faction of the republicans were beaten in every ward in which they appeared on the ticket voted at the aldermanic election of yesterday.

There were socialist candidates in 33 of the 35 wards, but in only six were there contests, and in these the fights were waged by the socialist candidates on the "continuous and active opposition to the war" voiced in the national platform of the party adopted at St. Louis.

One socialist member of the council was up for re-election, William E. Rodriguez, of the Fifteenth ward, and he was beaten by the votes of women.

In the Third ward, where the strongest fight of the half dozen made by the Thompson forces for their candidate was made, the result went against the mayor's adherents by a large majority.

The completion of the new council will be 46 democrats, 22 republicans and two socialists.

John W. Raney, democrat, as elected to congress in the Fourth district to fill a vacancy caused by the death of Charles Martin, democrat.

### This Lad Knew What He Was Talking About, at That

The daylight saving-law tends to mislead many people in some manner or other. The latest victim is a small boy whose bed time now comes at an unheard of early hour. A few nights ago his mother went to the door to call him from his play. "Aw, go on," exclaimed the frae lad. "Why, it isn't even dark yet."

### Obituary

GEORGE W. LAIDLAW, 48 years old, 297 Dodge street, died Tuesday morning after an illness of pneumonia of one week's duration. Mr. Laidlaw was a salesman at Hayden brothers. He is survived by his widow and three brothers, A. G. of Omaha, Richard of Nebraska City, Neb., and Thomas of Winnipeg, Canada. Funeral services will be held at Jackson's chapel Thursday afternoon at 2 o'clock. Interment will be in Forest Lawn cemetery.

MRS. EMogene JONES, 62 years old, 2119 Sherman avenue, died Tuesday night following an operation. Mrs. Jones had lived in Omaha about 20 years. She is survived by one daughter, Miss Georgia Jones, and a sister, living in Lincoln. Funeral services will be held at Tugart's chapel Thursday afternoon at 2 o'clock. Interment will be in Forest Lawn cemetery.

PAUL L. RAY, 42 years old, died at his residence Tuesday night of pneumonia. Mr. Ray is survived by his father and mother, Mr. and Mrs. W. Ray; two sisters, Miss Mary E. Putney and Mrs. Beatrice Weisort, and a brother, Stewart R. Ray. The funeral will be held Thursday afternoon at 2 o'clock at the Crosby undertaking parlors.

MRS. IMOGENE D. JOHNSON, 56 years old, 2520 Chicago street, died from pneumonia Tuesday night. A son, Clyde C. Johnson, a member of the United States expeditionary forces in France, and one daughter, Mrs. Mona J. Woodman, Springfield, Mass., survive. The body will be taken to Springfield, Mass., Thursday afternoon.

## URGES EDUCATION OF ALIENS IN U.S.

### Secretary Lane Pleads for Foreigner Within Our Gates in Conference to Americanize Foreign Born.

Washington, April 3.—America can become a "composite and purposeful nation and impose no authority other than the compelling influence of affection, sympathy, understanding and education," Secretary Lane declared today in an address which sounded the keynote of a conference called to plan the Americanization of many millions of foreign born.

The secretary spoke to an assemblage of state governors, chairmen of state defense councils, heads of civic organizations, industrial leaders and business men, gathered at the invitation of the Department of Interior.

A federal legislative program which calls for an appropriation to the bureau of education is to be fully considered and Americanization dealt with as a war measure to counteract the anti-American propaganda among aliens.

### A Great Experiment.

"We are trying a great experiment in the United States," he asserted. "Can we gather together from the ends of the earth people of different races, creeds, conditions and aspirations, who can be merged into one? If we cannot do this we will fail. If we do this we will produce the greatest of all nations and a new race that will long hold a compelling place in the world."

"There is no such thing as an American race, excepting the Indian. We are fashioning a new people. In this sense we are all internationalists."

"We have a great body of our own people, 5,500,000, who cannot read or write the language of this country," said Secretary Lane. "That language is English. And these are not all of foreign birth. A million and a half are native born."

"We are drafting into our army men who cannot understand the orders that are given them to read. Our man power is deficient because our education is deficient."

In his plea for the education of aliens and American illiterates alike, Secretary Lane alluded to "the crumbling of Russia."

"The cause of Russian disaster," he said, "was the ignorance of the Russian people, 30 per cent of whom could not read or write, none of whom, practically ever, had participated in the affairs of their own country. If America is not to be Russianized, and there is no fear of that, we must put into our hearts a truer appreciation of the things we believe America to represent."

### Coal Licenses Delayed; Dealers Not Shut Down

The shortness of time which has elapsed since the regulations governing distributors of coal and coke, were promulgated, that the United States fuel administration will allow jobbers and purchasing agents to continue selling coal, as the licenses are late in arriving.

The license regulations became effective April 1, but all distributors who filed their applications before that date will not be forced to suspend operations.

### Cocoon Oil Fine For Washing Hair

If you want to keep your hair in good condition, be careful what you wash it with.

Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Just plain mulified cocoon oil (which is pure and entirely greaseless), is much better than the most expensive soap or anything else you can use for shampooing, as this can't possibly injure the hair.

Simply moisten your hair with water and rub it in. One or two teaspoonfuls will make an abundance of rich, creamy lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily, and removes every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to manage.

You can get mulified cocoon oil at most any drug store. It is very cheap, and a few ounces is enough to last everyone in the family for months.—Advertisement.

## MEAT INJURIOUS TO THE KIDNEYS

Take a tablespoonful of Salts if Back hurts or Bladder bothers.

We are a nation of meat eaters and our blood is filled with uric acid, says a well-known authority, who warns us to be constantly on guard against kidney trouble.

The kidneys do their utmost to free the blood of this irritating acid, but become weak from the overwork; they get sluggish; the eliminative tissues clog and thus the waste is retained in the blood to poison the entire system.

When your kidneys ache and feel like lumps of lead, and you have stinging pains in the back or the urine is cloudy, full of sediment, or the bladder is irritable, obliging you to seek relief during the night; when you have severe headaches, nervous and dizzy spells, sleeplessness, acid stomach or rheumatism in bad weather, get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning and in a few days your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidneys, to neutralize the acids in urine so it is no longer a source of irritation, thus ending urinary and bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink, and nobody can make a mistake by taking a little occasionally to keep the kidneys clean and active.—Advertisement.

## High Lights on Plaster Job

This is not a photograph taken from an aeroplane. It is a picture of the plastering that is being put on at the annex of the county hospital. It shows the metal lath sticking out and looks like a skimmer perforated with holes ranging in size from a dime to a quarter. The specifications for the contract call for plastering put on in a thorough and workman-like manner.

What kind of work are the taxpayers of Douglas county getting for their money in the new addition to the county hospital, now under construction? In response to suggestion that the job would invite inspection, a Bee representative made a survey of the work and incidentally photographed the plastering, which is being put on the metal lathing, so thin that the light goes right through it and shows innumerable holes in it. This is the photograph here, reproduced for public information.

The addition to the hospital, which is intended to relieve the overcrowding in the basement, provides for a one-story frame and a stucco building, 42x168 feet. The contract is let to Moore Brothers, under plans and specifications drawn by Architect J. M. Nachtigal. The first contract calls for something over \$10,000 and several thousand dollars more will be necessary to complete the building for occupancy.

On the plastering the only provision in the specifications calls for three coats of plaster to be done "in a thorough and workmanlike manner." It is the first coat which is already on and which soon will be covered up, when the second coat is put on previous to the finishing coat. This plastering is on the interior walls.

The outside walls are to be of stucco board, covered with two coats of cement, the thickness of the cement-plastering being specified as five-eighths of an inch thick for the first and one-fourth of an inch for the second. The outside stucco work, however, has not yet begun.

Employees at the county hospital say there is no regular inspector representing the county on the job and that the architect has been out only a few times.
