

U. S. INSTALLS NEW NAVAL BASE ON AZORES ISLANDS

Portugal Aids Establishment of Station for American Submarines and Homing Station for Airplanes.

Washington, April 11.—For the protection of the Atlantic trade routes to southern Europe, the United States, with the consent of Portugal, has established a naval base on the Azores islands.

Guns have been landed to begin fortification of the station, which, in addition to being used as a naval base for American submarines, destroyers and other small craft, also will serve as an important homing station for American airplanes, a number of which already have been assembled there.

Portuguese Co-Operate. Negotiations now are in progress between the State department and the Portuguese government to insure full co-operation between American naval forces and the local authorities of Portugal on the islands for the adequate defense of the station. This action will simplify the task of protecting the great trade routes not only to southern Europe and the Mediterranean, but also regarding traffic to South America and southern gulf ports in the United States.

Portugal was not only willing to enter the arrangement, but was eager to see it perfected that her own lines of communication to its colonial possessions would be covered. The value of the new station supplies for American submarines, submarine chasers and destroyers on the voyage to Europe already has been demonstrated. It is permissible to disclose these facts now because it is known to the government that they are known in Germany.

The despatch adds that the deliveries of the grain already have begun.

Petrograd, April 11.—Russia has sustained tremendous losses as a result of a peace pact with Germany. One-third of its total mileage of railways, amounting to 21,530 kilometers (13,350 miles), is in German hands, besides 73 per cent of the total iron production, 89 per cent of the total coal production, 268 sugar refineries, 918 textile factories, 1,685 breweries, 133 tobacco factories, 1,685 distilleries, 244 chemical factories, 615 paper mills and 1,073 machine gun factories.

BOLO CONVINCED HE IS MARKED FOR EXECUTION

Paris, April 11.—Bolo Pasha, condemned to death for treason, but granted a reprieve of indefinite duration on his plea that he had important revelations to make to the military judicial authorities, entertains no doubt as to what his ultimate fate will be, according to the Petit Journal today. It quotes him as saying to his keeper on Monday:

"I will go to Vincennes, but others will surely follow." It is at Vincennes that French military executions take place. Bolo is continuing his "revelations," but the utmost silence is preserved in official circles as to their trend. He will be heard again today, which is expected to conclude the hearings. The newspaper LaVictoire does not take the view that the prisoner's execution is imminent. Whatever importance may be attached to Bolo's eleventh hour confession, it says, one result is certain, which is that several days will elapse before his execution, as the things he reveals will have to be investigated and corroborated or disproved "and the wily Bolo has doubtless gained an indefinite postponement."

Rub Youngsters' Colds Away With "Outside" Vapor Treatment

Local Druggists Have Imported the Invention of a North Carolina Druggist That Relieves Croup and Cold Troubles by External Application.

You Can Try a 25c Jar on 30 Days' Trial and Your Druggist Will Refund the Purchase Price if You Are Not Delighted with the Test

Every mother breathes a sigh of relief when she first tries the North Carolina treatment, Vick's Vaporub, and finds that it is no longer necessary to "dose" the children with nauseous medicines for croup or cold troubles. Vaporub comes in salve form and when applied over the throat and chest the body heat releases the ingredients in the form of vapors. These vapors, inhaled with each breath, all night long, carry the medication direct to the air passages and lungs. At the same time Vaporub

is absorbed through and stimulates the skin taking out that tightness and soreness in the chest. Vaporub has a hundred uses in the home—for deep chest colds, sore throat, bronchitis or incipient pneumonia just apply well over the throat and chest and cover with a warm, flannel cloth. For head colds, hay fever, asthma or catarrhal troubles Vaporub can either be applied up the nostrils or a little melted in a spoon and the vapors inhaled. Croup is usually relieved within fifteen minutes and an application at bedtime prevents a night attack. All mothers are urged to take advantage of the 30-day trial offer now being made by the local druggist and see for themselves just what Vaporub will do.

World's Fate in Balance, Declares Utah Senator

Chicago, April 11.—Declaring that a country that is not worth dying for is not living in, Reed Smoot, United States senator from Utah, in an address before the Industrial club tonight, declared that peace could come only through the defeat of the central powers and that it will not be accomplished by "soft words or beautiful phrases couched in perfect rhetoric."

"The war must go on," he declared. "The fate of the world for decades to come is hanging in the balance. The war must not end until victory of the entente allies over Germany is accomplished and we must not stop to count the dreadful cost of such a victory, for democracy has no choice. It must win or it will perish. The peace cry and procrastination in the past got in their deadly work, and we have to pay for the delays caused by them in the loss of life and billions of dollars."

Just Try This When Hairy Growths Appear

(Modes of Today)

A smooth, hairless skin always follows the use of a paste made by mixing some water with plain powdered delatone. This paste is applied to the hairy surface 2 or 3 minutes, then rubbed off and the skin washed, when every trace of hair will have vanished. No pain or discomfort attends the use of the delatone paste, but caution should be exercised to be sure that you get real delatone.—Advertisement.
