

MASK TORN FROM ALLIES, DECLARE RUSS RADICALS

Bolsheviki See Entente Waiting to Overthrow Workmen's Party; Taught by "German Teachers."

Moscow, Thursday, April 25.—(Via Vladivostok, April 26.)—The newspaper *Arvestia* publishes various letters which were found upon M. Kolodona, a Vladivostok member of the Siberian autonomous government, bearing on projected negotiations with the representatives of the allied powers at Vladivostok and Peking for the recognition of Siberia. The letters urged haste, saying that delay would strengthen Japanese influence to the disadvantage of all others.

"In commenting on this the bolshevik *Pravda*, says: "The mask is torn off the 'allied' diplomats, who are waiting at Volodga for the moment to overthrow the power of the workmen's and soldiers' deputies. The documents which we publish today establish indisputably the program of action which has been feverishly mapped out by the allied pupils, according to the method taught by the German teachers of imperialistic banditism."

FIFTEEN BILLIONS WANTED BY BAKER FOR MILITARY USES

(Continued from Page One.) units, some of the men of the May draft may be assigned to these new organizations.

It is regarded as likely, however, that the April and May drafts will be used to fill up divisions at home, while the seasoned troops from those divisions are sent out overseas to fill the gaps. Since the number of divisions on the other side is rapidly and steadily increased the flow of replacement troops must increase proportionately.

To Provide for 3,000,000 Men.

A new draft of the annual army appropriation bill providing for the needs of 3,000,000 men under the \$15,000,000,000 program, will be laid before the house military committee when it reassembles next Monday. Secretary Baker, Major General Marc, chief of staff, and other officers appeared today at the committee's executive session, discussing the estimates to carry out the immediately foreseen war work.

While some of the house administration leaders voiced support of the war department's program, the sentiment expressed was not altogether unanimous regarding the request for unlimited power to determine the size of the army. Senator Sherman, in an address to the senate, said he could not support such a plan and that congress should fix the number of men. Representative Dent of Alabama, chairman of the house committee, intends to press his bill, which would authorize an army of 4,000,000 in addition to the 1,000,000 volunteers already in the service. On the other hand, Representative Kahn of California, the ranking republican member, has declared himself thoroughly in favor of the war department's program.

Aircraft Falls Short.

Secretary Baker told the committee the airplane program had not met expectations and blamed the situation on over-confidence of the government and lack of ability of contractors to fulfill their contracts as speedily as they had promised.

He said the Liberty motor was beginning to be produced in quantity and that it was an unqualified success, so much so that foreign governments wanted to use it. His trip to Europe, he said, opened his eyes to the magnitude of operations.

While Secretary Baker was discussing army expansion, Secretary Daniels and his chief aides were outlining the navy's needs to the naval committee of the senate, in connection with the \$1,358,000,000 naval appropriation bill passed by the house.

Press Service Controversy Submitted to Supreme Court

Washington, May 3.—Presentation of arguments on the petition of the International News Service—the Hearst service—for dissolution of injunctions restraining that organization from pirating Associated Press news was completed today in the supreme court. The case was taken under advisement and no indication was given as to when an opinion would be rendered.
