"Billiken" Shoes
Are "Bully"

That's What Every Child Says

And after all, it is what the child thinks of the Footwear he or she has to wear, that counts.

If you fit little feet with the proper kind of a Shoe, it will grow right, will be a comfort instead of a source of annoyance and real pain and worry to the owner—and if you fit them with "Billiken" Shoes, which are made over the same pattern that Nature makes little feet, you will find they will train little pedals in the way they should grow.

Just now we are exploiting the Summer Footwear, and we are showing a most complete stock in all sizes.

Billiken Shoes have three excellent points of merit that every mother should know.

FIRST—Flexibility—As easy on little feet as a soft kid glove. SECOND—The Nature Shape—Permitting little toes to grow naturally. THIRD—Not a Nail or Stitch—To hurt the tender little feet.

These points have a direct bearing upon the general health of your child, and they are feet features that should not be overlooked.

Priced according to style and size.
