THE BEE'S SERVICE FLAG

Pangermanism is finally forced out into the open as the real cause of the great war, and the world knows what it has to face at last.

Among other things left behind by the outgoing administration is one "welcome arch," which could well be added to the discard.

South Dakota has put a maximum price of \$10 per bushel on seed corn, about the figure the speculator would have named for the whole

Nebraska's winter wheat crop has the official endorsement of Secretary Houston as being first chop. Later returns will more than verify this

Ukraine farmers are proving a disappointment to their new German overlords. The kaiser is finding out that he may enslave a mujik, but can not make him plow.

If seven billions can be saved by adopting treasury estimates instead of army requisitions, it ought to be done. The amount is worth while, but the principle is even more.

Des Moines announces that a "truce" has been reached over the quartermaster's depot, but not until our Iowa friends had tried every way to get the business taken from Omaha.

Motor truck lines have been declared common carriers, and will be subject to all the laws and rules provided in such case. This is just a reminder of the fact that the first of common carriers were wagons moving along highways. Human experience is imitating history.

Another View of the Potash War.

More bitter and acrid than the potash itself is the row between the democrats at the state house over how to dispose of Nebraska's newly acquired mineral wealth. According to the zeal and acrimony which so far have marked the proceedings, a fairly good-sized darkey must be concealed in the woodpile somewhere. Were it not for the fact that a little group of former state employes tried to put over a deal that was nipped in the bud, outsiders might think that most of the squabble had no basis. The ugly fact is that the land commissioner apparently caught somebody with the goods; that the legislature declined to follow the governor's recommendation, and now the state treasurer can not see his way to join his associates in doing something to get the leasehold muddle straightened out and the flow of revenue started. In his exasperation, his excellency recalls a controversy between his predecessor and the state treasurer. At that time the governor of Nebraska called the treasurer a lot of hard names, threatened him with removal from office and excommunication from the party, but when it came to a showdown, John H. Morehead worked for the renomination and re-election of Treasurer Hall, and, just as "Wilson kept us out of war," so also he fastened on Nebraska a bunch of democrats who spend much time quarreling among themselves. In good time the people will turn them out, and maybe then we will discover what it is all about. At present it seems potash lakes belonging to the state.

The Day We Celebrate.

This Day in History.

"SOMETHING BESIDES SENIORITY."

Senator Hitchcock's own personal newspaper organ, the hyphenated World-Herald, which bravely stands for him through thick and thin and does its best to back him up, hard as it often is to do so, insists that in his elevation to the chairmanship of the foreign relations committee "there is something besides seniority to account for his present position."

Well, what can it be? Is it his sponsorship of the kaiser's bill for an

embargo on the export of arms? Is it appreciation of Hitchcock's scheme to help Germany by stopping our allies selling securities in this country?

Is it his whole-hearted endorsement by the German-American alliance and of the German-American alliance?

Is it his carefully cultivated social intimacy with Von Bernstorff and the German embassy attaches?

Or is it that beautiful front-page gratefully dedicated to his portrat by "The Fatherland?" Something besides seniority, sure!

Is it Hitchcock's public interview opposing declaration of war upon Austria?

Is it this democratic senator's periodic at tacks upon the Wilson administration?

Is it his brazen effort to preserve the right of enemy aliens to vote in Nebraska? Is it the soft pedalling of his World-Herald on

the repeal of the odious Mockett law that made the teaching of German in our public schools compulsory? Or is it the order issued to sub-editors not to

offend the tender sensibilities of the pro-Germans by using the words "Hun" or "Boches" in his newspaper?

Is it one or all of these things? Better let it go as blind deference to "seniority."

Spreading the "Terror."

From Spain comes a circumstantial tale of how the Germans are systematically undertaking to terrorize the few remaining European neutrals. All that has been accomplished by means of U-boats, raids on hospitals and Red Cross stations, bombing of sleeping hamlets, murder, arson and rapine, is now summed up, tabulated and reduced to convenient totals that he who reads may understand what it means to resist the Hun in his devastating course.

Stately and solemn the figures move along, telling in money values what the proponents of kultur have wrested from the hapless victims who have fallen into their clutches. Even the small item of women's parasols is not overlooked, showing that the orderly mind of the German bandit misses nothing when he starts to collect. History is but repeating itself in this; the house of Hohenzollern was founded on similar proceedings, although it is not known that the originators of that brood of robbers kept so meticulous a record of the loot. But the purpose is the same as that of the gas bomb and the "terror" gun.

It is notice to the peoples among whom it is circulated that if they do not want their pockets picked, their wardrobes looted, their pantries demolished, in addition to having their throats cut, their children mutilated, their wives and daughters treated worse than beasts, they will quietly submit to the dictation of the Potsdam gang.

The strange part of the whole proceeding is that, while Germany has been at this for four years, none has yet been sufficiently frightened to submit. However, the circulars Berlin is now scattering may be of service when the time comes to send in the bill that civilization will later

Crop Situation Abroad.

While Americans have been taken up with their own efforts to increase the supply of food for the world, and are making great headway in that direction, it will encourage them to know that those to whom we have devoted our surplus are doing their utmost to help themselves. Particularly is this true of the United Kingdom, where agriculture is being carried on at the highest pitch ever attained. In England the acreage sown to winter wheat is 56 per cent greater than two years ago, while the prospect for the crop is better than in many years. Other plantings are equally good in prospect. Scotland returns a similar report, the spring sowing there exceeding former years, both in extent and condition. Weather conditions have been especially favorable for farm work of all kinds. Ireland is not reported on in detail, but the political disturbances over there have had the singular effect of stimulating agricultural effort and more land is being tilled than was used last year. France will have a better wheat yield, according to the present outlook, although the sown acreage is still smaller because of the scarcity of help. Italy has not neglected planting, but suffers, as does France, by reason of shortage of farm labor. Generally, the promise is for good crops and consequent relief from short rations. The demand on the United States for food will continue strong, but the fact that our allies are doing all they can to produce their own food makes our task the more pleasant.

"Fighting men first" is the shipping board's to be who is going to get the money out of the rule now for giving out cargo space, and the people will support this cry.

Omaha, May 8 .- To the Editor of

states' rights or secession, I would rethings he said. "This union, one and inseperable." Now, as to Mr. Aiken or the past or present statesmen, let me for their edification relate an incident I remember that happened at to secede, he would admit, but they should not take one damn foot of American territory with them.

I am led to believe Mr. Aiken of his own eye first. Surely, at this time, he would not like to see two weak governments instead of one great big government that will dictate terms and peace for the whole world. Then again, suppose the south had se-ceded or got its freedom. In turn, every state both north and south would and could have the same plea to secede one from the other. Draw the curtain. S. C. MALIN. 2812 Hickory Street.

That New Broom.

Omaha, May 12 .- To the Editor of Now that the smoke of the late battle for good government has cleared away, it may not be amiss to

While we should expect and will experience untold benefits from the radical change, no doubt, many good people who expect too much of the

not as yet dawned. We had grown used to hearing the municipal coal yard spoken of as "Dan Butler's coal yard," "Joe Hummel's parks and boulevards" they are our servants and will strive to serve with that end in view, that whatever department or whatever part of the work may fall upon today.

May we not as an intelligent and enlightened people take a step for ward and instead of simply with one turn of the wrist turn all the "rascals out" and with another turn put in a new set of rascals and build up an other political machine. There is absolutely no difference in political mahines except that some are old while others are new. Why can we not have a city government where one citizen of this city can go to the city hall on business and have just as much influence with the commissioners as some personal friend of some particular official? If we have a city oal yard, let's have a city coal office where any taxpayer can go any time whether known or unknown, lay down his money and place his order and have it delivered in its turn.

Just at this time the government is service. Why not follow this plan from the crowd of hungry pie hunters who are causing the newly elected

Telephone Rates Lower in the United States Than in Europe

Rates for telephone service should be based upon the cost of materials and labor and the kind of service furnished.

Wages paid telephone employees in this country are practically double those paid in Europe for the same kind

Telephone materials also cost a great deal more in America than abroad and the grade of telephone service furnished here is far superior as everyone who has traveled in Europe knows.

Thus, the same materials could be purchased, the same amount of labor employed and service, such as is provided, could be furnished for less money in Europe than in America.

When the cost of operating is twice as much in America as in Europe, telephone rates in Europe, to be proportionately equal, should be only a dollar for service costing \$2.00 in America, and a long distance call costing \$1.00 here should only cost 50 cents in Europe.
