## for our wounded

An official photograph of the club with which German armies "finish off" wounded soldiers. Italian forces recently captured 32,000 of these.

## OR THIS

Shall your wounded boy be brought out from No-Man's Land by the helping hand of the Red Cross or shall he be left to the fiendish cruelty of the Huns?

Shall the fate of thousands of Italian, Russian, French and British soldiers wounded on the field of battle who could not be rescued, be suffered by our American soldiers?

The weapons of a savage cave-man of 5,000 years ago were devised with no more fiendish ingenuity than the clubs pictured above, with which the Germans "finish off" the enemy wounded they find who have fallen on the field of battle.

*The American Red Cross Needs your money to rescue wounded soldiers from the shell-torn land between the lines and from the trenches where disease stalks.*
