STATE CONTROL BOARD WILL NOT CHANGE SYSTEM

Lincoln, June 14.—(Special.)—To correct a story in circulation that the board of control of state institutions is contemplating making a change in the system of teaching. The board makes the following statement:

Some one, possibly with an ulterior motive, has been in circulation a report that the board of control contemplates changing the oral system of teaching at the school for the deaf at Omaha. In the first place, it requires an act of the legislature to change a system at the school for the deaf, the present system having been authorized by the legislature in 1911. No member of this board has indicated, in any manner, that the oral system is to be changed, nor would it be well to do so, in my judgment.

This statement is made that all who are interested in the school for the deaf may know the facts, and their attention is directed to chapter 42 of session law No. 173, section 1, of the session laws of 1911.

OMAHA RISK CO. AND CHALCO BANK IN CONTROVERSY

State Insurance Board Hears Complaint Over Purchase of \$36,000 of Notes; Ballard Out of Race.

(From a Staff Correspondent.) Lincoln, June 14.—(Special Telegram)—The Mutual Benefit, Health and Accident association of Omaha and the German-American State bank of Chalco had an inning before the state insurance board this afternoon over a controversy that has arisen, which may become serious before it is settled.

It appears from the statements of the attorneys, T. J. Nolan, who appeared for the bank and Mr. Kennedy, who represented the insurance company, that solicitors for the insurance company had sold notes amounting to \$36,000 to the Chalco bank. The transaction came to the notice of the state banking board and the officers of the bank were compelled to make the amount covered by the purchase of the notes good. The bank then proceeded to attempt to collect on the notes and asked the insurance company to make up the balance.

The company holds that it is not responsible for notes taken by its agents or for transactions covering the sale of the same. It appears that after the bank officers had been notified that the company would not stand responsible, the bank purchased \$19,000 more of the notes.

After the matter had been discussed at some length, the banking board decided to allow depositions to be taken in the presence of a representative of the board and the matter come up later.
