

## FREMONT FLYER WOUNDED BY HUN HOME ON VISIT

Merle Cotterell Shot Down While on Bombing Expedition During German Offensive in March.

Fremont, Neb., July 17.—(Special Telegram.)—Merle Cotterell, son of Mr. and Mrs. George Cotterell, who was shot down while dropping bombs from his airplane on the German army as it started on its offensive in Picardy in March, is in Fremont on a leave of absence.

He was in a British hospital for two months after the accident, suffering with partial paralysis of the legs. He has almost fully recovered. Since landing at Halifax a month ago he has been at a convalescent hospital at that place. Enlisting with the Canadian forces at Chicago last December, Cotterell sailed with a Canadian contingent.

On the day that Cotterell was brought down he was flying at an altitude of about 2,000 feet and had dropped eight of the ten bombs when the fire from the Hun anti-aircraft guns forced him to turn and start for home. He had gone a short distance when a shell struck the right wing of his plane and he fell in the lines of the Australians and was picked up and given first aid by them.

By a coincident Cotterell arrived in Fremont in time to attend the funeral of his brother-in-law, Hugh Emory of Fremont, a member of a cavalry company who was accidentally drowned at camp near San Benito, Tex. The funeral will be held Friday morning.

## Nebraska News Notes

Practically half of the postoffice force at Norfolk has been called in the draft and July 22 will see the office handicapped. Four of the employees will leave with Madison county's contingent next Monday, consisting of 69 men. Many of these men have been taken from deferred classes and under reclassification work they were placed in Class I. Madison county's Class I list is practically exhausted.

The grain harvest is on in north Nebraska and wheat and oats are being cut. Early indications are that winter wheat is in good condition and that spring wheat is rather light. The quality of the grain is excellent. The corn prospects are the best in the history of the territory and much of the corn is beginning to tassel out. Rains have fallen in all parts of the territory during the past few days.

C. E. Burnham of Norfolk, Joseph Hayden and W. S. Jardine of Omaha have been made new directors of the Square Turn Tractor factory. Following a conference it was announced that the Norfolk factory is now on a war basis and begins immediately a program of increased production.

A number of fields of wheat in the Adams vicinity are yielding well. Ed Galloway reports a yield of 30 bushels to the acre, and a number of other farmers in that vicinity say their wheat will average from 20 to 30 bushels.

Reports in political circles are that W. L. Dowling, former county attorney of Madison county and son-in-law of ex-United States Senator W. V. Allen, will become a republican candidate for attorney-general.

Doctors of northern Nebraska are on a war basis and are planning to volunteer their services with the government. Dr. A. F. Jonas, who spoke to the doctors at a Norfolk meeting, had much to do in interesting the doctors in the needs of their government. An advisory board was organized and volunteers will soon offer their services.

H. J. Mooney of Omaha, who went to France sometime ago with a telephone organization, was recently chosen to help take care of 500 French refugees, who escaped from the Boches, a letter to Mooney's sister, Mrs. A. L. Seymour, announces. Private Mooney says many other Nebraska boys were in the camp and after seeing the plight of the refugees they were more anxious to have a chance at the German enemy.

The Madison County Council of Defense has announced to Madison county people that they should not sell their Liberty bonds. The council is especially anxious to stop the sale of certain stock for which Liberty bonds are being received as payment. Several slackers were before the council during the past few days and were ordered to subscribe to patriotic funds.

Gen. L. W. Colby, chairman of the exemption board, has called a meeting for next Tuesday evening to investigate alleged attacks on the draft board by a number of Germans in the Beatrice vicinity. A number of witnesses have been called.

## Prize Winner Buys Bond

Miss Lillian Lancaster of Kearney, winner of the Bee Americanization contest, is a real patriot. She not only can write cleverly on making the United States safe for Americans, but willingly does her share. "I invested the prize money in war savings stamps," she wrote The Bee in acknowledging receipt of the money.

## THE MAIN OFFENSIVE

There are few cowards in this world. After hearing what our men have done on the western front, we are tempted to say there are none. Seldom does a man ever run away or break under terrible shelling or the wild fear of death. What a man will do in the stress of battle appears to depend largely on his vital organs.

Our boys on the fighting line are physically fit for military service, because only about one man out of five was chosen to endure the hardship of this fearful war. Very often the kidneys are to blame. To have strong nerves, a strong will and "pep," one should have good kidneys; otherwise a man suffers from backache, sleeplessness, or is troubled with nerves. Drive the poison out of the blood by taking Anuric, double strength. If the kidneys are clogged with toxic poisons or uric acid, you suffer from stiffness in the knees in the morning on arising, your joints seem rusty, you may have rheumatic pains, pain in the back, stiff neck, headache, sometimes swollen feet or neuralgia pains.

—All due to uric acid or toxic poisons stored in the blood, which should be swept out. Keep well by drinking plenty of pure water, and take Anuric three times a day for a month.

Ever since the discovery of uric acid in the blood by Scheele, in 1775, and the bad effect it had upon the body, scientists and physicians have striven to rid the tissues and the blood of this poison. Because of its over-abundance in the system it causes backache, pains here and there, rheumatism, gout, gravel, neuralgia, and sciatica. It was Dr. Fieroe who discovered a new agent, called Anuric, which will throw out and completely eradicate this uric acid from the system. Anuric has proved to be many times more potent than lithia, and consequently you need no longer fear muscular or articular rheumatism or gout, or many other diseases which are dependent on an accumulation of uric acid within the body. Anuric sells for sixty cents

## The Bee's Fund For Free Milk and Ice

While this rain, bringing with it a grateful coolness is a general blessing, it will, indirectly, be the cause of much suffering among the children of the very poor, scattered through the congested districts of the city.

The temporary cool spell will be followed by rising temperature and the steaming atmosphere, on the hot days that are sure to follow in the wake will be so humid that some of the homes where babies live will be insufferably uncomfortable.

It is to combat this the Bee's milk and ice fund has been created and from now on the need of its ministrations will be great, for the conditions now are such that pure milk and ice must be used to combat the foes of existence of the children of the very poor.
