Applications for Place on Primary Ballot Still Coming in To Office of Secretary Of State.

From a Staff Correspondent.  
Lincoln, July 25.—(Special).—Although the time for filing for office expired last Saturday, applications to go on the ballot are still coming in to the office of the secretary of state and are accepted.

Today J. W. McKissick of Beatrice accepted a petition which came in last Saturday for the nomination for the state senate from the Fourteenth district.

A receipt accompanied by an affidavit from the county treasurer of Colfax county showing that J. R. Henry had paid the fee on July 17, as a candidate for the democratic nomination for the senate for the Tenth district, reached the secretary of state this afternoon.

Charles W. Orr, who filed from the Sixth senatorial district as a democratic candidate for the state senate, withdraws his name.

### Hitchcock Makes Trouble in Lincoln Federal Labor Bureau

Lincoln, July 25.—(Special).—Not long ago J. L. McGrew of the Department of Labor at Washington came to Lincoln and located an employment office in the Lincoln labor temple. After having gone over the local situation Mr. McGrew picked the labor temple location as the best fitted for the activities of the bureau. The rent is free to the federal government. Trouble immediately arose between the federal office and the bureau of statistics presided over by Norman at the state house. Norman wanted to run the federal office as a branch of the state bureau, although the federal government selected the employees and paid all the expenses. On this proposition the two bureaus could not agree. Norman made a trip to Washington. Senator Hitchcock hangs around Washington. Then an attache of the Lincoln federal office visited Kansas City, where the director of federal employment offices for Nebraska makes his headquarters. The next move was that Mr. Cowles, who had been in charge of the federal office for some time, and a most willing and efficient man, was removed and a protégé of Senator Hitchcock was appointed in his stead. Soon after the change in managers the question of removal of the bureau from the labor temple was agitated by the new appointee and Norman and another attache of the federal office. There isn't anybody else in Lincoln urging or suggesting a change. Lincoln unions are protesting to the Federal Department of Labor and to President Wilson.

## Two Pounds Per Capita Monthly Sugar Ration Beginning August 1

Washington, July 25.—The American public was asked by the food administrator today to go on a sugar ration of two pounds per capita monthly beginning August 1, to meet a world shortage and to care for the immediate demands of the military forces. The American public at present is on a three pounds per capita ration monthly. Household rationing will continue voluntarily as at present, but public eating places will be required to observe new regulations effective August 1, permitting the use of two pounds of sugar for every 90 meals served.

Unless the consumption of sugar is reduced both by householders and the public generally, the food administration warns, supplies for Belgium, the Red Cross, Young Men's Christian association, Knights of Columbus, Salvation Army and other organizations working for the welfare of American military forces in Europe cannot be maintained.

Manderson Lehr Assigned to Aerial School Established Behind Allied Lines on Western Front.

Albion, Neb., July 25.—(Special Telegram).—Parents of Manderson Lehr, noted aviator of this city, who has done such brilliant work on the western front in the past year, received a letter from him today to the effect that he has been given a new assignment.

The letter was written from some point on the front "over there," a week ago Sunday, and he states he has been assigned to an aerial school back of the lines for the purpose of instructing aviators in bombing work. This would indicate the mobilization of a large number of men and machines, at the point where training takes place and that large squadrons are to be instructed in special offensive work in which the bombing of enemy supply depots and ammunition dumps will be done by American aviators on a larger scale than has heretofore been possible.
