BETWEEN TURK AND HUN.

Rumored friction between the Turk and the Hun over the division of spoils wrested from DAILY (MORNING) - EVENING - SUNDAY Russia and Roumania holds interesting possibilities. An open break and a separate peace for Turkey would be a severe blow to Germany. This, though, seems too much to expect. The diplomacy that won Turkey to support the kaiser's "Mitteleuropa" dream did its work well, and is not to be undone swiftly.

Victory for the Hun means the restoration of the Turk to control of much Christian territory, wrested from him in a long series of wars. For a war that is to be without "indemnity or annexation," the Huns are having considerable trouble in deciding who is to have the swag.

Thirty-seven automobile owners said "good morning, Judge," and so received a lesson in observing traffic regulations. This is one way of convicing them.

Mayor Smith says he puts the city's business above politics. Good! But what about those salaried nonpartisan appointees who are putting politics ahead of city business?

The Omaha Junior Yellow is creating terrible havoc among the Germans. Since the big battle started two weeks ago, it has captured more than a million of them. If it keeps on, the crown prince will have no army left and the war will be over.

Some one wants to test the aspirants for high office by a show-down of what each has done to help win the war. That would put out of the run-

Consideration of all this, however, is merely academic. The practical point presented is that the army is under control of Germany, and while the Turkish government may rebel against dictation from Berlin, the soldiers are not likely to follow the lead of the politicians. The affair will have to develop more fully before any advantage for our cause can be seen in it. Turkey's withdrawal at this time would largely offset the collapse of Russia, but such a thing is not yet

America and Ireland.

John Dillon's naive suggestion that the Irish question be referred to President Wilson must be considered as a final attempt at evasion. No serious objection may finally rest against the application of the principle enunciated by Mr. Wilson, wholly subscribed to by the Entente Allies, but its operation must wait the outcome of the war. In the meantime all Americans would be pleased if the Irish could only adjourn their disputes among themselves to the extent of contributing of their man power to the winning of the war. America, England, Scotland, Wales, France, Belgium, Portugal, Australia, Canada, the South African Union, India, Italy, Serbia-a glorious company-await the presence of Ireland on the battle line, and the Irish hold back, nursing a private grudge. When Erin's sons join the forces of freedom in the general struggle for liberty they will be putting themselves in a much better light. .

"Cashing In" the Thrift Stamps.

Disclosures from postoffice and banks indicate that locally a considerable resale of thrift stamps has occurred of late. What motive has inspired holders of these securities to dispose of them is not made plain. In many cases it is not the urge of want, or the necessity of business, for it has

Home Problem of City Finance.

Omahans do not need to go abroad in search of municipal problems in finance, for they have one at home that is worthy of their best attention. The secretary of the Board of Education reports an increase for the year in the deficiency budget of the city schools, the total now approximating half a million dollars. Moreover, the maximum levy allowed under the law will not produce sufficient revenue to carry the schools along, insuring an addition to the indebtedness. How the situation is to be met is not indicated. It was proposed a little while ago that the business matters of the schools be placed in the control of a single agent, who should manage the affairs and be responsible for expenditures. Proponents of the plan believed, and gave reasons for that belief, that such a plan would result in economies more than justifying its adoption. It is plain that the growth of the city puts an increasing burden on the schools, and that the cost of operating them will mount from year to year. But it is equally apparent that possible savings should be made, that the strictest economy should prevail, all extravagances be eliminated and a policy adopted that will keep cost somewhere in the neighborhood of the income. And this is up the school board.

been the larger buyers who have "cashed in." One of the big banks reports that the average card presented for redemption contains about \$22 of the stamps. From the postoffice it is given out that many of the \$1,000 "limit" purchases

have been taken up. Here is something wrong. At the outset, the "limit" sales were not in accordance with the spirit of the plan, which was to encourage thrift and promote a habit of saving among that class of citizens who could not reasonably be expected to buy Liberty bonds. These were to be given an opportunity to patriotically contribute to the expense of conducting the government in war times, and at the same time to have a sound, though small, investment. Redemption was made easy, that none might suffer through possible adversity, yet the purchase implied an intention that almost amounted to a contract to allow the government the use of the money for five years. Those who are asking for their money back might almost be accused of "welshing" on Uncle Sam.

Whatever the proposed inquiry may discover, the fact that it has been made necessary is far from creditable to the state. Purchasers of thrift stamps ought to be game and go through with the bargain they have made.

The crown prince has paid the Yankee boys the highest compliment in his power, that of sending his best troops, fitted out with brand new equipment, against the line held by the Americans. ment, until normal corditions can be restored. It is entirely probable that for several years after the war it will be necessary for the allied countries to keep the present system in operation and that in the interchange of resources they will require for themselves all available supplies, without leaving anything for nations on the outside.

Out of this war agreement will undoubtedly grow a broader and more perfect trade compact, after the war, perhaps covering a definite period of years, to which there will be formal agreement by all the countries concerned. No country will be permitted to enter into this compact without the consent of as "miscellaneous."
