

HERE'S A SIMPLE PROBLEM IN ACREAGE

Convert Your Acres Into Dollars Serve Your Country and Its Allies

There are 32,369,477 acres of farm land in Nebraska
There are 14, 655,687 acres in Nebraska under cultivation.
There are 16,121,493 acres in Nebraska uncultivated.

There are 312,822 acres in Nebraska under irrigation.
There are 904,285 horses and mules in Nebraska.
(It takes 5 acres of ground each year to raise feed for each horse or mule).

There are 4,521,425 acres of cultivated land devoted to feeding horses and mules in Nebraska.
Out of 32,369,477 possible acres in Nebraska suitable for farming, only 10,134,262 acres under cultivation are utilized in growing grain for human consumption.

Something Should Be Done

The government has pointed the way by urging the use of trucks and tractors. Only by using power machinery can we supplant the man-power now at

war and increase production and efficiency. The elimination of every horse or mule means transferring 5 acres of ground to our cause. The

use of trucks and tractors will aid greatly in turning the 16,121,493 uncultivated acres into productive acres.

The Least You Can Do is Investigate the Truck and Tractor Situation

NOTE:---The acreage figures shown are approximate. They are taken from state records but do not quite check against each other. However they are accurate enough to present the true situation.

These Firms Have Joined Together to Support Increased Production and Better Transportation

Nebraska Buick Automobile Co.
G. M. C. Trucks and Samson Trucks.
Van Brunt Automobile Co.
Fulton Trucks and Plowman Trucks.
Card-Adams Motor Co.
Denby Trucks.

T. T. Stewart Motor Co.
