

# HELPING WIN THE WAR

*By Producing More Food*

IN food lies the strategy of the War! This fact, as shown by market reports and price levels, is becoming increasingly apparent.

It is the mission of the Semi-Centennial State Fair to lend a gigantic stimulus to food production for the coming year.

*By all means of the finest exhibits of live stock and farm products that have ever been shown will the Fair perform its service to Uncle Sam*

A feature of the Fair will be a great Government Exhibit representing the departments of War, Navy, Agriculture and Commerce as well as the Food Administration and Committee on Public Information.

The government exhibit will give Nebraskans a new insight into the war activities of the government. It will appeal to every live American.

*The amusement program of the Fair will have no equal in the past.*
