Fremont Council Charges Favoritism in Light Rate

Fremont, Neb., Sept. 5.—(Special).—The squabble over the advance in the electric light rates continues. The board of public works, in charge of the municipal lighting plant, asked the council for authority to put into effect a schedule of new rates amounting to about a 20 per cent increase. Objection was raised by some of the councilmen on the ground that the larger consumer of power current was being favored at the expense of the smaller users. A special committee was appointed to readjust the rates and report back at a special meeting Tuesday evening. A slight adjustment was made, but still it failed to satisfy Councilmen J. W. Andrews and Charles H. Hawley, who thought the users of large quantities of current are given too low a rate. Action was deferred till a future meeting.

MILLION RAIL GET RAISE OF \$25 A MONTH

Order Effective as of Sept. 1 Adds Approximately \$150,000.000 to the Annual Payroll.

Washington, Sept. 5.—Nearly 1,000,000 railroad employees, including clerks, track laborers, and maintenance men, are to receive wage increases of \$25 a month, the equivalent of \$1 a day, or 12 cents an hour, over the pay they received last January 1, under a wage order issued by Director General McAdoo. Advances are effective as of September 1.

This order, affecting half the railroad men in the United States and adding approximately \$150,000,000 to the annual payroll in calculations of labor representatives, represents the second largest aggregate wage increase ever granted in American industrial history. It is supplementary to the general railroad wage order issued nearly four months ago, providing for about \$300,000,000 increases and for the classes of employees affected, it supplants provisions of that order.

Most of the employees covered by the new order have made considerably less than \$100 a month and the voluntary increase was decided on by the director general after investigation by his advisory board of railroad wages and working conditions of the pay of men doing similar work in other industries.

Classes Benefited.
Classes sharing in the increases, with the new minimum rate for each, are as follows:

Those doing clerical work of any description, train announcers, gatekeepers, baggage and parcel room employees, train and engine crew callers, operators of office and station equipment devices excepting telegraphers, whose application for wage increases is under consideration, together with chief clerks, foremen, sub-foremen and other supervisory forces of the preceding groups, \$57.50 a month.

Office boys, messengers, others under 18 months of age, and station attendants, \$45 a month.

Janitors, elevator and telephone switchboard operators, office, station, and warehouse watchmen, \$20 a month.
Stationary steam engineers, and chief stationary engineers, \$110 a month; stationary firemen and power house others, \$99; locomotive boiler washers, 35 cents an hour, with maximum of 66 cents an hour, operators of transfer and turn tables, 45 cents an hour.

Laborers, employed in and around shops, round houses, and other buildings, \$19 a month; laborers (excepting harbor employees, to be provided for separately), such as engine watchmen and wipers, firebuilders, ash pit, boiler workers, etc., 31 cents an hour, with maximum of 43 cents an hour; other common labor in these departments, 28 cents an hour, with maximum of 40 cents an hour.

Track Workers Included.
In the maintenance of way department, those receiving the \$25 a month or 12 cents an hour increases over the pay of last January 1, together with the minimum for each class, are as follows:

Foremen of the kinds of work known as building, bridge, painter, signal, construction, mason and concrete, water supply, maintenance and plumbing, \$115 a month; for assistant foremen of these classes, and for foremen of classes known as coal chute, coal wharf, fence gang, and for ditching and hoisting engineer and bridge inspectors \$108 a month.

Track foremen, \$100 a month; assistant track foremen, five cents an hour above rate paid laborers whom they supervise.

Mechanics in maintenance of way and bridge building departments who were not included in wage advances for shop crafts several weeks ago, 55 cents an hour; helpers and mechanics in these departments, not provided for in the wage order affecting shopmen, 43 cents an hour.

Common laborers, 28 cents an hour, with maximum of 40 cents.
Drawbridge tenders and assistants, pile drivers, ditching and hoisting firemen, pumper engineers and pumpers, and crossing watchmen or flagmen, lamplighters, add \$25 a month to wages of January 1.

Coach cleaners are to receive a minimum of 25 cents an hour, with a maximum of 40 cents. This is ordered as a supplement to the action affecting shop men.

For groups not specifically mentioned among the preceding classifications, the standard increases of \$25 a month or 12 cents an hour were ordered.

In no case are wages received under the

general wage advance order to be decreased. Wages for new positions are to be in conformity with rates for similar kind of work. The order does not apply in cases where amounts of less than \$10 a month are paid to individuals for special part time services. Employees assigned to higher rated positions are to receive the higher rates, but those demoted temporarily are not to have their wages reduced. When called to work out established 48 hours, employees will be paid a minimum allowance of three hours.

OFFICERS TRAIL MAN GUILTY OF BOMB OUTRAGE

Arrest of Culprit Within 24 Hours Predicted; 200 Government Agents Working on Case.

Chicago, Sept. 5.—The arrest within 24 hours of the man who placed a bomb in the entrance of the federal building yesterday, killing four persons and injuring a score of others, was predicted tonight by federal officers.

Two thousand government agents have been working on the case ever since the explosion and scores of persons known to be of radical tendencies have been arrested and questioned.

Four theories are offered by the police to explain the outrage: First, that it was an I. W. W. plot to permit the escape of William D. Haywood, secretary-treasurer of the organization as he was in the building at the time of the blast; second, that it was the work of a German sympathizer; third, that it was paced by an anarchist; and fourth, that it was the work of a "crank."

Americans Head Off Raid On Village of Frapelle

With the American Forces in Lorraine, Sept. 5.—German patrols made a sortie from their lines yesterday following several hours of shelling of the village of Frapelle. They evidently were planning on being able to take prisoners.

An American lieutenant saw the enemy party coming and proceeded into No Man's Land with scouts in an attempt to surround the Germans. The enemy was put to flight, leaving two prisoners in the hands of the Americans. No casualties were suffered by the Americans.

Continue Examination of Suffrage Petition Signers

The examination of signers of the anti-suffrage petition was continued in the juvenile court room in the county court house Thursday. Calvin Emery, who is conducting the hearing for Judge Flansburg of Lincoln, before whom the case will be tried in Lancaster county, presided. Suffragists allege fraud in the securing of signatures to the petition. Mrs. H. C. Sumner, who is actively supporting the suffrage amendment, stated that the matter would probably be settled in time to allow the women to vote at the November election.

Joe Hawkins testified that he signed the petition on the request of an unknown man who told him he was to receive 5 cents for each signature. He also testified that he signed the name of his brother, Charles, who was unable to write. He signed the petition on the representation by the circulator that the petition favored suffrage.

P. Prosham, a laborer living in W street, denied signing the petition and said that his name was forged without his permission, although he does not favor suffrage. Several more witnesses have been summoned to appear before the hearing ends.
