Mabel Montgomery Recovers After Long Suffering By Taking Tanlac

"No one could see the wonderful change that has taken place in our little daughter during the past few weeks and doubt Tanlac being a grand medicine," said Mrs. H. W. Montgomery, residing at 2701 Bristol street, Omaha, Nebraska, re-

"Mabel is now 13 years of age," continued Mrs. Montgomery, "and had suffered terribly for five years. One of her troubles was inflammatory rheumatism. Her feet and hands would swell very badly and at times she couldn't walk. She had no appetite, suffered with frightful headaches and in place of growing Admission, 25c and 50c. No war tax she seemed to be losing ground. She was often in bed for several weeks at a time and we had to keep her out of school all the past year. She was a very sick child and although we spent lots of money for medicines, nothing seemed to reach her rouble, and we had begun to think she would never get well.

"One of our relatives urged us to give her Tanlac and now you wouldn't take her for the same child. She has actually gained thirty-four pounds and looks the picture of health, and to all apances is perfectly well. She never complains of an ache or a pain nor a disagreeable symptom of any kind. She is brimful of life and ambition now and enjoys life and play like other children. Soon after she began on Tanlac her appetite came back and she increased in weight so fast that we were astonished, and the swelling, pain and headaches gradually disappeared. She is now able to enter school again and we are more than grateful for what Tanlac had done for her. I have also taken Tanlac for loss of appetite, poor digestion and nervousness, and it has done me a world of good. I feel fine all the time and am glad to say all I can for Tanlac."
