CLASSIFICATION OF DRAFT LISTS NEARLY FINISHED

Questionnaires Soon Will Be Sent to Youths of 18 and Men Between 37 and 46.

Washington, Oct. 15.—Classification by local boards of men of the new draft regulation has been so rapid that questionnaires soon will be sent to youths of 18 and men between 37 and 46 years of age.

Under new regulations men fit for general service are to be noted as class A men on military records, while men fit for such service, if cured by treatment, are to be noted as class B. Below these are established class C-1, in which men fit for "general limited service," which is defined as being in the service of supplies overseas, or in general service within the United States, and class C-2 to a certain men fit only for restricted duty within the United States in capacity approved by medical officers. Class D is for men unfit for any service.

South Side WALTER E. WOOD DIES ON VISIT TO RIVERTON, NEB.

Death of Prominent South Side Resident Is Unexpected; Had Large Circle of Friends.

Walter E. Wood, one of the first commission men in business in Omaha, died Monday at Riverton, Neb., of heart disease while on a visit there to some of Mrs. Wood's relatives.

Mr. Wood was in his usual health when he visited his many friends in the Stock Yards Exchange a few weeks ago and his death comes as a shock to them.

Walter Wood was born in Missouri in 1863. Shortly thereafter the family moved to Chicago, where his father, James Wood, was one of the founders of the firm of Wood Brothers. He came to Omaha in 1885 to establish a branch of the Chicago house and was continuously in business here up to three years ago when he sold out and retired.

Mr. Wood was with him at the time of his death. Besides the widow he is survived by two brothers, Charles and George, and one sister, Mrs. L. Coy, all of Chicago.

Funeral services will be held Wednesday at Ashland, Neb., at 3 o'clock.

Mr. Wood was probably as well and widely known as any man in the Omaha market. He was an indefatigable worker, of an affable disposition, courteous, liberal, warm-hearted and loyal, and the news of his death will be received with regret by many in all walks of life.

A New Principle in Complexion Treatment

Most creams are injurious when used habitually. They clog the pores and eventually form a permanent, stinging film which interferes with eliminative action and makes the skin sticky and puffy. There is an application—mercolized wax—which acts upon an entirely different principle. While perfectly harmless, it has the peculiar property of removing by absorption the dead and half-dead particles of sebum, dirt and other matter in the pores.

BIG TRANSPORT SINKS WITH U.S. TROOPS ABOARD

Former German Liner Goes Down in Hoboken Harbor; Five Sailors and Two Sailors Missing.

Hoboken, N. J., Oct. 15.—Shortly before the American transport America, formerly the German trans-Atlantic passenger steamship Amerika, was about to sail today for Europe with soldiers and supplies, the vessel foundered at its pier here.

In the early morning darkness, while the troops aboard were sleeping, the America settled with its keel in the mud, leaving only three of its eight decks, together with parts of its funnels, above water.

Troops Guard Pier

Troops were placed on guard outside the pier and details regarding the sinking were denied to inquirers. The cause of the accident remained a mystery even to Navy department officials.

It was learned that a gang of man-chinists was at work at the time the vessel settled and it was suggested that one of these men inadvertently opened a sea-cock under the impression that he was closing it.

The submerged America, next to the largest of the government's transports, was within sight of persons crossing the lower Hudson on ferry boats.

Was Big Vessel

The America, of 22,622 tons gross, has a capacity of carrying 8,000 troops and a crew of 1,200 men. Of the troops, it was said that only 200 or 300 were on board at the time. All the coal had been placed in the bunkers except a small portion to have been loaded today.

Inasmuch as all the troops and crew were reported to have escaped, it was believed the vessel sank slowly.

May Develop Scandal

The sinking of the America makes the second transport thus put out of commission in New York harbor since the war. On April 25 last the liner St. Paul sank while being warped into its pier. Water poured into an open coal port and it turned over. The St. Paul was not raised until about two weeks ago.

Thirty Feet of Danger

The intestinal canal is an important part of every individual, important every inch of its thirty feet. The upper portion of it is intended for the digestion of food and absorption of its useful portions. But the lower part is concerned with the elimination of waste material.

It is, in other words, the great sewer of the body. The more food eaten, the greater the waste. If a sewer becomes clogged up, its contents stagnate and become more and more dangerous. Constipation means more than failure to evacuate the bowels regularly and thoroughly. It means stagnation, increased fermentation, putrefaction and germ action. Increased amounts of irritating and poisonous substances are formed. Absorption of these into the blood follows. Self-poisoning results. Danger, disorder, disease, or even death follow.

Nujol for constipation. Nujol prevents stagnation and self-poisoning. Nujol forms no habit, except a natural, healthy habit. After Nujol has trained the bowels to act, it can be dispensed with. Regular as Clockwork. Warning: Nujol is sold only in the Nujol Trade Mark. Insist on Nujol. You may suffer from substitutes.
