Chicago, Nov. 20.—Prospects of an increase of the movement of the new crophad a bearish effect today on corn. The market, although unsettled at the close, was ic to 2½c net lower, with December \$1.29\%, to \$1.29\%, and January \$1.31\%. to \$1.31½. Oats finished % c to 1½ down and provisions up 5c to \$1.

Notwithstanding that the corn market fluctuated rapidly and that at one time the January delivery touched the highest point yet on the crop, the general ten dency most of the session was clearly down grade. Forecasts for better weather for husking and for transportation from rural sources did a good deal to make silling aggressive, and so too did knowl-odge that a large number of car permits

New York Coffee. New York, Nov. 20.—Some disappointment was expressed in the coffee trade this morning that a meeting of the board of managers was not followed by any an nouncement as to the prospects for re-suming business in futures. The opinion was very generally expressed, however, that progress was being made and that the points under consideration had narrowed to the question of restrictions on imports and business in the spot market. Pending further developments the local spot market remained nominal and no change was reported in the cogt and freight situation. The official cables showed an advance of 75 reis in the Rio market.
