

to be present to map a policy to be followed in taking care of the potash In this connection it may be stated

that there are 500,000 tons of potash in storage, worth \$10,000,000 under present prices, which the producers stand to lose unless the government Would Leave Consumer Alone, comes to their rescue.

Nebraska, by recent development, produces more than 60 per cent of the entire American output. Five factories are nearing completion.

Huge Market Waiting.

Before the war, according to W. E. Sharpe of Lincoln, the United farmers held in Lincoln October 16, States was getting from Germany a committee was appointed to make 225,000 tons of German potash. Of this, 180,000 tons were being used tive to the dairy industry throughin the fertilizer business. When out the country.
