"Modern methods of cooking and the rapid pace at which people of this country live has made such an alarming increase in iron deficiency in the blood of American men and women that I have often marveled at the large number of people who lack iron in the blood, and who never suspect the cause of their weak, nervous, run-down state. Lack of iron in the blood not only makes a man a physical and mental weak-ling, nervous, irritable, easily fatigued, but it utterly robs him of that virile force, that stamina and strength of will which are so necessary Which to success and power in every walk of life. back of head."

Answer: Your condition indicates the need of a strong, harmless tonic nutritive to restore nerve equilibrium, which in turn fortifies and strengthens the organs of nutrition, thus vitalizing the blood and promoting new cell and tissue to take care of the waste forces. Three-Grain Cadomene Tablets, packed in sealed tubes with full directions, are recommended in all such cases.
