WHY SOCIETY WOMEN WASH THEIR OWN HAIR

They do, not because it is a fad,

manda and a management of the second

but because they wish to obtain the greatest possible hair beauty and be sure they are not using anything harmful. They have found that in washing the hair it is never wise to use a makeshift, but is always advisable to use a preparation made for shampooing only. Many of our friends say they get the best results from a simple home-made canthrox mixture. You can use this at a cost of about 3 cents a shampoo by getting some canthrox from your drug gist and dissolving a teaspoonful in a cup of hot water. This makes enough shampoo liquid to apply to all the hair instead of just the top of the head, as with most prepara-tions. Dandruff, excess oil and dire are dissolved and entirely disappear in the rinsing water. Your hair will be so fluffy that it will look much heavier than it is. Its luster and softness will also delight you. - Adm.
