Corn Production in 1918 Was Very Low While 1917 Production Abnormally High.

Lincoln March 10.—The March crop report of the bureau of crop estimates and Nebraska board of agriculture states that 28 per cent agriculture states that 28 per cent of last year's corn crop is still on farms. This the equivalent to 34,464,000 bushels compared to 139,705,000 bushels on hand a year ago. The great difference is accounted for from the fact that the 1918 production was very low while the 1917 production was abnormally high. The poor quality and immaturity of the 1917 crop which delayed husking and this as well as car shortage higher prices. Other sections will need more corn for local requirements. The estimated stocks of corn on farms in the United States is 883,322,000 bushels compared to 1,-92,905,000 bushels a year ago.

The present stocks of wheat on arms is estimated to be 5,608,000 ushels. Nearly a million bushels of MISS HELEN REYNOLDS.

An Omaha girl who has won distinction in caring for wounded and disabled soldiers, is Miss Helen Reynolds, daughter of Capt. B. F.
