

South Side FEDERAL LABOR BUREAU TO BE THING OF PAST

Congress Fails to appropriate Funds and South Side Employees in Charge of Work to Be Dismissed.

The federal employment bureau of the South Side will cease to exist after March 22 as a result of the failure of congress to pass the sundry service bill, appropriating funds for the continuance of this service, according to P. J. Barrett, head of the South Side agency. It was believed for a time that the funds on hand would be sufficient to maintain the agencies until the appropriation was made. This has not proved to be the case and consequently only a nucleus of the agencies will be retained in this and other states.

Unusual activity marked the day's work in the offices of the Board of Public Welfare, when Frank W. Bandle, supervisor of public dance halls, entered with unwonted alacrity. Mr. Bandle looked around to make sure that none of the women of the office were within hearing before he described the denatured form of the "cootie rag."

Mr. Bandle stated that he has been suppressing the "shimmie," and "shimmie-jazz," but as for the cootie-rag it will not live in Omaha as long as Supervisor Bandle retains his eyesight.

In order to eliminate any possibility of buckling or warping of fabric, all Howe automobile tires, guaranteed for 5,000 miles, are cured, after being baked with an extra ply of fabric. The Howe tires, handled exclusively by the Lininger Implement company, Sixth and Pierce streets, were but recently introduced into the middle west and have made rapid strides in popularity to motorists. All Howe tires are built over-sized, meaning the economy and heavy wear-resisting construction. All sizes except Ford sizes are built in non-skid type only.

G. E. Kamms, former Omaha man, during the last five years a resident of Milwaukee, has returned to Omaha as local representative of the Allis-Chalmers tractor. Mr. Kamms has spent the last few years in the interests of the tractor industry and with the taking over of the distribution of the Allis-Chalmers machine, predicts an extensive business throughout the west. He will make his home here.

Visitors at the show are spending much of their time looking for a display of the new Dixie Flyer "d'Elite" models of which arrived in Omaha by express too late to be on exhibition. W. R. Nichols, 2520 Farnam street, local distributor for the Dixie Flyer, has placed the two models on display in the sales room. Beauty, speed and comfort are the chief features of the car, that has gained great popularity throughout the east and south.

A chassis of the powerful Studebaker Six is the object of laudable criticism of motorists at the show this week. The vital working parts of the car are in open view to the spectator. Because the Studebaker manufactures completely in its own factory at South Bend, Ind., its bodies, axles, motors, transmissions, steering gears, springs, tops, fenders and other vital parts, middlemen's profits are eliminated.

The low, racy body, high radiator and hood, 32-inch wheels and bright color effects of the Chandler "Dispatch" tells a story of motor car genius. This model had its first season in the market last year and was popular everywhere, the demand being greater than the Chandler Motor Car company, busy with its production of artillery tractors for the army could supply.
