HUNS OPPOSED TO ALLIES FOOD **ARRANGEMENTS**

Make Political Capital o Agreement and Juggle Figures to Create Opposition Among Citizens.

Berlin, March 17 .- (By Associaed Press.)-Indications are that he average German is not enthusiastic over the amount of tood he is likely to get under the provisioning agreement with the allies. After his first feeling of enthusiasm over the long desired arrangeure out his share of the provisions under the terms of the document, an extended summary of which was and tedious task, but comparatively published officially this morning, and such comment as is made reflects an undeniable feeling of disappointment at the quantity provided.

This was particularly the case because the newspapers, in reducing the totals to figures in pounds per capita, take as the basis of their When cross, irritable, feverish or estimates the population before the preath is bad, stomach sour, look at war and work out the result at 10 pounds monthly per person, instead of the approximate 18 pounds, which results from a computation upon the foul, constipated waste, sour bile basis of a population of 45,000,000, and undigested food passes out of excluding the self-providers on the farms, as the food ministry contemplates doing. This means that the allotment would be a half pound of flour and a 10th of a pound of fats per day to supplement the waning German food stocks.

'In commenting on the agreement, Vorwaerts predicts that the indeent socialists and the Spartacans vill make capital of the fact that there is a proviso in the agreement sick child tomorrow. The newspaper says the workmen will be told that the government induced the entente to insert this proviso to prevent them from using the stock as political weapon.

The newspaper declares that in reality the proviso was contained in the draft agreement submitted by the inter-allied delegates to the Brussels conference. The delegates undoubtedly insisted upon it, Vorwaerts thinks, in order to make Germany finance as large a propor-tion of the supplies as possible by means of exports, so that Germany's gold resources might be reserved indemnity payments. newspaper characterizes the agree-ment as "anything but a success."

Spain Endorses League as Proposed by Wilson

Madrid, March 17 .- (By the Associated Press.)-A committee appointed by the government to study the subject of Spanish participation in the league of nations has submitted a report which will be considered at a special cabinet meeting today or tomorrow. The government entirely endorsed President Wilson's proposals, but reserves its decision as to reductions of armaments and the fixing of military forces by members of the league. It is understood that the government will ask definite assurances as to the Spanish coast line, protectorates in Africa and the suitability of military service as social discipline for Spain. The wish is also expressed that this country may maintain close relations with South American nations of com-

non race origin and language. Spain will be represented at conference of neutral nations at Paris by Manuel Gonzales Hontoria, a liberal deputy and in 1912 undersecretary of foreign affairs.
