BRITISH PLAN LARGE COMBINE TO DEVELOP OIL

Government Will Back Most Powerful Enterprise in History of Oil Industry After War.

London, March 28 .- (Correspondnce of the Associated Press)-Profiting by the costly experience of the war, when it was compelled to send enormous sums into other countries in payment for petroleum and petroleum products, the British government has adopted a clearly de-fined oil policy and is already credited with financially backing what is expected here to develop into the most powerful oil producing, refinng and transporting enterprise in he history of the industry.

Stories concerning the governnent's policy have been in circulation on a number of occasions and ecently were revived by reports that the Royal Dutch-Shell oil interests were about to take control of the Mexican Eagle Oil company, an important member of the Lord Cow-

The government's first important novement, it was stated by authorties here, will be the creation of a ish companies or individuals in ob-taining concessions and leases in foreign countries, as well as help them to conduct their oil business

in countries outside the empire. The importance of the ministry will be better understood when it is realized that a large part of the unleveloped oil territory of the world lies under British dominion and, according to British law, the capital of every oil company operating in British territory must be not less than 60 per cent British-owned, and all the control must be in the hands f British citizens.

The next move in the development of this policy, it is asserted, is the combination under the protection of the government of the most important oil companies operating in British and neutral countries, if they ire wholly or partly British-owned These include such concerns as the Royal Dutch, the Shell and the Lord Cowdray interests.

It recently became known that the British government was buying the holdings of British citizens in the Royal Dutch, the ownership of which was then conceded to be 60 per cent Dutch and 40 per cent Brit-Accompanying these statements were equally interesting stories concerning the Shell Transport and Trading company's securities, whose ownership was closely allied

to that of the Royal Dutch. This Royal Dutch-Shell group which takes note of all that is going

Attorney General Will Seek Representative of Lenine In Legislation to Deal With Advocacy of Sedition After War Is Ended.

Washington, March-28.-Congress will be asked for a new law by At drney General Palmer, if the Department of Justice finds it impossible to deal with lawless agitation after the proclamation of peace and the attendant expiration of the espionage act under which prosecutions for sedition are now brought. "Anyone who is counting upor being able to advocate sedition in this country with impunity after the expiration of the espionage act will find himself sadly mistaken," said the attorney general today. BOLSHEVIK SAYS

U. S. Declares Conditions Alone Brought About Bolshevism in Russia./

New York, March 28 .- A gold sign on the door, bright red carpets on the floor, a pleasing but rather authoritative girl with a pronounced English name, who wears what might be either a Russian blouse or a smock, her hair bobbed, Greenwich village style, and who addresses half a dozen or more seemingly busy, studious men as "comrade," are the exterior indications that the government of soviet Russia is now officially represented in the United

Except for the things mentioned and the accent of the men, the offices are no different from those of any other going business. They are on the 18th floor of a modern building that faces Broadway, a short Lenine-Trotzky Headquarters.

It is officially in the bureau of in formation of soviet Russia, S. Nuorteva, director, but it is also for the present the official headquarters of A. Martens, representative of Lenine-Trotzky government to United States.

Broad shouldered, blue eyed, light haired, soft spoken, not large, but impressively big, Representative Martens has the appearance and bearing of a business man or director of a great industrial enterprise From an American standpoint he is not a good politician. He is chilly and apparently suspicious. He smiles easily but fleetingly as though smiles should never be given more than a second of any man's time.

"It is foolish to say that the government of soviet Russia financed the bolshevik movement in Hungary," Representative Martens said. Money is not necessary to the establishment of bolshevism. Bolshevism is nothing but socialism put into practice and the only thing necessary is to bring it about is con-
