Red Cross Notes

The auxiliary was organized July 18, 1917. Since July 1918, with a membership of 25 active workers, 320 hospital garments, 590 surgical dressings and 210 refugee garments, and many knitted garments, have been made. Every quota has been finished and every demand upon this auxiliary has been met with a cheerful and prompt response.

Miss May Tobin, acting chairman of the knitting department, announces that as yet only 120 sweaters and 140 mufflers of the knitting quota—920 garments to be completed as soon as possible—are in the field. Eight of these sweaters and three of the mufflers have been finished and returned. Knitters are needed to make the completion of this quota possible.

The Carter Lake auxiliary met on Thursday, March 27, and completed its last quota of refugee garments, and, with the money left in the treasury, decided to adopt a French orphan and care for it.

Mrs. A. D. Chapman, chairman, announces that the auxiliary will not disband, but from now on will meet once every month in the homes of the members and keep in readiness for any relief work that may come up. The first meeting will be held at the residence of Mrs. A. T. Gibson, 2552 Marcy street, the first knitting quota will be taken up at once.

Mrs. Edward L. Burke will be home next week from Excelsior Springs.

DRINK HOT WATER IF YOU DESIRE A ROSY COMPLEXION

Says we can't help but look better and feel better after an inside bath.

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a certain amount of combustible material in the form of ash, so the food and drink taken each day leaves in the alimentary organs a certain amount of indigestible material which if not eliminated, forms toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment to sustain the body.

If you want to see the glow of healthy bloom in your cheeks, to see your skin get clearer and clearer you are told to drink every morning upon arising, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waste material and toxins from the stomach, liver, kidneys and bowels, before putting more food into the stomach.

Men and women with pallid skins, liver spots, pimples or sallid complexion, are those who wake up with a coated tongue, bad taste, nasty breath, others who are bothered with headaches, bilious spells, acid stomach or constipation should begin this phosphate hot water habit.

A quarter pound of limestone phosphate costs very little at the drug store, but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshens the skin on the outside, so hot water and limestone phosphate act on the inside organs.—Adv.
