promoting the further irregular advance of quoted values on the stock exchange today.

Sentimental factors included the re-Sentimental factors included the re-moval of federal restrictions against the packing interests and the more encourag-ing views entertained by leading financial authorities regarding general business pros-ports.

The market retained all of its long-es-

tablished professional characteristics, how-ever, pools extending their operations into various channels, especially leather and opper shares. In both of these groups there were marked evidences of trade revival, an ex-tensive inquiry for refined metals being re-ported for foreign interests at prices well above those of recent weeks.

Rails and U. S. Steel were the chief

drawbacks, transcontinentals and grangers displaying marked firmness. In the case of U. S. Steel, it was considered signifi-cant, in spite of two active sessions, that

the stock closed unchanged from last week's final prices.
Shippings and oils were extremely variable, though ending mostly at gains and food and fertilizer shares again moved orward, but industrial alcohol was most

conspicuous, holding the greater part of its 7 points advance. Trading in bonds was marked by greater Trading in bonds was marked by greater expansion, but the tone continued irregular, mainly on the further easing of internationals, liberty issues railying after early recessions. Sales (par value) aggregated \$14.375.000. Old U. S. bonds were unchanged on call, coupon fours gaining % per cent on sales.

Demand from both packers and shippers appeared to be active, although buyers hesitated to pay the prevailing high prices and trade was inclined to be a little draggy. Attractive beef steers especially the light and handy weight grade sold a shade stronger than Monday, but the general market was quotably about steady and this also applied to cow stuff Business in stockers and feeders was rather moderate in volume, but prices were firmly held as a rule.
