Miss Stearn Will Lecture Before Many Audiences During The Coming Week

Omaha is daily hearing various lectures gained from the unusual experiences and work of Miss Luttie Stearn, a club woman whose work has taken her among the foreign claims of northern Wisconsin, and into every state in the union.

By discovering that these children were under-nourished-with everything from water from which cabbage was cooked, to beer as substitutes for milk, she commenced the famous "Milwaukee penny lunches" where little school children had hot chocolate, hot milk and hot soup all for a penny. If the penny even were impossible, it was for merely the

This became such an institution that recently the school board took the work over with a yearly appropriation of \$5,000.

Another interest developed, and finding that the children were reading poor books, she took the library advantages to them. Every week Miss Stearn, with two boys and six baskets, made a trip to the library. The librarian became interested in these unusual visitors, and next Miss Stearn was appointed superintendent of the Circulating Department of Milwaukee. She became convinced that the mind as well as the body must be fed. During the eight years that Miss Stearn was interested in this work, 100,000 books were cire culated 700,000 times. She soon discovered that Bohemian children were not only reading the books, but were translating them to their parentsthe simplest of American stories.

Five years ago she gave up up this work for lecturing with a record of 150 free public libraries established and 1,600 little book for a return engagement of three boxes as a souvenir.

Why Spring Brings Out

Freckles and Eruptions

The sudden appearance of freckles, slight eruptions of fine lines at this season is attributed by scientists to the "actinic ray," which is usually active during the spring months. There's nothing to gain, and much to be feared in cheapening labor.

No one disputes that America is enjoying her greatest era of prosperity. The savings banks show a greater volume of money and larger number of depositors than ever before in history, and this despite the fact that the cost of living is appreciably higher.

The reason is the opportunity offered by the war for big profits induced employers to offer increased wages in order to secure skilled labor in sufficient number to carry out their war contracts.

That gave the American workingman HIS opportunity to eat three square meals, live in a HOME instead of a house, and lay aside a dollar for a rainy day.

And Because of That Condition America Prospered.

Business men who are lying awake nights trying to figure out a way to induce labor to accept a substantial cut-could better spend the time figuring out a plan whereby wages can be kept at the present high standard and keep prosperity and content with us.

Souphouses, crime, anarchy, and bolshevism are not conducive to good business or national prosperity and they only come under an era of LOW WAGES.

The right thing and the only thing to do is to place the whole of America on a higher plane-everybody take a step UP-just as we "save daylight" by getting up an hour earlier.

A few cents an hour means the difference between a discontented automatic machine-like a workingman who works merely for his board and a place to sleepand an intelligent, light-hearted man with the time and means to improve his mind, see a little pleasure and look forward to his future with hope instead of despair.

Save by machinery, save by economy, save by system-but don't try to save at the expense of labor. Good morals, good business and good sense caution against it.

New Hair Growth After BALDNESS

COMMERCIAL PRINTERS - LITHOGRAPHERS - STEEL DIE EMBOSSERS

HAIR GROWN ON MR. BRITTAIN'S BALD HEAD BY INDIANS' MYSTERIOUS HAIR GROWER

My head at the top and back was absolutely bald. The scalp was abiny. An expert said that as he thought the hair roots were extinct, and there was no hope of my ever having a new hair growth. Yet now, at an age over 66. I have a luxuriant growth of soft, strong, lustrous hair! No trace of baldness. The pictures shown here are from my photographs.

Indians' Secret of Hair Growth

At a time when I had become discouraged at trying various hair lotions, tonics, specialists' treatments, etc., I came across, in my travels, a Cherokee Indian "medicine man" who had an elixir that he asseverated would grow my hair.

Although I had but little faith, I gave it a trial.

To my amazement a light fuzz soon appeared. It developed, day by day, into a healthy growth, and ere long my hair was as prolific as in my vouthful days.

That I was astomished and happy is expressing my state of mind mildly. Obviously, the hair roots had not been dead, but were dermant in the scalp, awaiting the fertillizing potency of the mysterious pomade.

I negotiated for and came into possession of the principle for preparing this mysterious elixir, now called Kotalko, and later had the recipe put into practical form by a chemist.

That my own hair growth was permanent has been amply proved.

Many men and women, also children, have reported satisfactory results from Kotalko.

How YOU May Grow YOUR Hair

My honest belief is that hair roots rarely die even when the hair falls, out through dandruff, fever, excessive dryness or other disorders. I have been told by experts that often when hair falls out the roots become imbedded within the scalp, covered by hard skin, so that they remain for a time like bulbs or seeds in a bottle which will grow when fertilized.
