WOMAN'S SECTION OF THE BEE

No man for any considerable period can wear one face to himself and another to the multitude without finally getting bewildered as to which may be true.—Nathaniel Hawthorne.

"DANDERINE" FOR FALLING HAIR

Stop dandruff and double beauty of your hair for few cents.

Dandruff causes a feverish irritation of the scalp, the hair roots shrink, loosen and then the hair comes out fast. To stop falling hair at once and rid the scalp of every particle of dandruff, get a small bottle of "Danderine" at any drug store for a few cents, pour a little in your hand and rub it into the scalp. After several applications the hair stops coming out and you can't find any dandruff. Your hair appears soft, glossy and twice as thick and abundant. Try it!—Adv.

Two of the best known French slang words are not, strictly speaking, soldier slang, "poulu" (hairy) being the affectionate name bestowed by the French people upon the soldier himself, and "boche" being the anything but affectionate term for the Germans.

"Embusque" (the ambushed one) is the term contemptuously applied to one who seeks a safe position far from the front or at the regimental depot; the squat little trench mortar is "raponillot" (a little toad); the machinegun is "moulin cafe" (coffee grinder); a heavy shell is "marmite" (a sauce pan); bullets are "marrons" (chestnuts) or "pruneaux" (prunes); his bayonet is "aiguille a tricoter" (knitting needle) or "tourne-broche" (roasting spit).

She kept her house full—crowded to the very door with young people and no one so quick as she to see a little cloud on the youthful face or to notice a note of trouble in a young voice, too unsophisticated to keep its owner's secret.

Money and time and counsel and love—with what a generous hand she gave them to all the world.

But in her heart of hearts—she kept a sanctuary for her own—the bone of her bone and the flesh of her flesh, the pride and the joy of her life.

What will they do without her in the great house over there in Pleasanton now that she has gone? Green is the grass upon the hills she loved, bright bloom the flowers in the garden that was her delight—but she who loved every inch of California almost as she loved her

Lovely Elsie Ferguson Is Analysed by One Who Knows Her

By GABBY DETAYLS.

We met one who knows Elsie Ferguson. He presented this picture and exclaimed:

"Look at that face! It isn't American at all. Not to an eye who has seen the world. The tumult and noise of New York was merely the earthquake that brought Elsie, the fee, to the surface in a vision bursting radiantly through the roaring vapors. Miss Ferguson hails from somewhere in the Romance Ages when Monks wrote Latin with goose-quills and men wore scale armour and women were graciously homely and noble and gentle. In her mellow, rosy voice nestles an echo of the troubadour trumpet, and certainly not the screech of our society woman. The gentle poetry of

Mrs. Uhl has been with her parents, Dr. and Mrs. Milroy, during Lieutenant Uhl's absence.

Mrs. Fred Hamilton and Master Fred, jr., have returned from California, where they have spent the winter at the Maryland hotel, Pasadena.

Charles Patterson, son of Mr. and Mrs. John Patterson, has returned from overseas service.

Mr. Paul Skinner is ill at his home.

her face, now calm, now arduous, is the kind that turned the cavaliers of yore into crusaders and handed real manhood down to us. The aspect of her figure, even the strangely swaying walk and listless gestures, belong in a royal forest when ladies rode on palfreys.

"The complexities of her nature are legion. She has in her the tender, lyric vein of a de Musset, and the graceful distinction of an Alma Tadema, but she has also the practical grasp and plenty of 'pep' and 'punch' when her pulse is more than normally active. She has in her the sweet melancholy of a great composer and the human appeal of noble effort, and she is mystically related to the powers that rule in Ultima Thule. All these contradictory elements, and many more, are kept in bounds and ruled over the scepter of a personality that looks before it steps, but never looks behind, that peers pensively into the future over the shattered temples of the past. She seldom mislays her scepter. That is why all who know her love her, and all who see her in motion pictures admire while they reverence her art."

Not for one single little minute do we doubt his word—but we are wondering if he has omitted anything in his psychological analysis of beautiful Elsie. We suppose not, however.

'Til Give You 3 Minutes To Remove Blackheads!

A Secret About Removing the Beauty Destroyers Which Few People Know. Also the Way to Remove Superfluous Hairs by "Dissolving Them."

By VALESKA SURATT.

STEAMING the face has never yet resulted in the removal of blackheads. Steaming the face enlarges the pores of the skin. By what argument could it be said that blackheads would disappear for that reason? Does anyone expect them to fall out because the pores are larger? Neither can blackheads be entirely removed by pinching, because where there are large blackheads there are also smaller ones, sometimes to the extent of thousands.

Here is a local treatment by which blackheads can be made to disappear in a few moments. A little norexin applied on a wet cloth, and rubbed on the blackheads, will make them vanish in a few minutes. You can easily convince yourself of this fact by trial. The norexin can be obtained at any drug store for fifty cents. Besides, it stimulates the skin and makes it fresh.

EVANGELINE—Why not use hydrolized talc on your armpits for that excessive perspiration? It far exceeds any liquid preparation and besides keeps the armpits normally fresh and does not absolutely dry them. Hydrolized talc can be supplied to you by any druggist for half a dollar, and it lasts a long while. Besides, it destroys all perspiration and other body odors.

MRS. F. G. B.—If beauty is only skin deep, so much more is the importance of making it as beautiful as possible. That mudiness may be very easily corrected, and you will find your freckles promptly disappearing, as well as all other blemishes by pursuing the following simple method. I have never known it to fail. Mix two tablespoonfuls of glycerine and three with a little auto solution and in a very rich, satiny cream will be the result. This should be used very freely every day. Nothing else will be necessary to give the skin a spotless and glossy appearance.

WORRIED—The texture of your skin makes wrinkles very pronounced. You can quickly get rid of the wrinkles by using the new method given here. This has the effect of greatly refining the skin texture and as a result the pores of the skin are made smaller. When this occurs the skin takes on an added vigor and plumpness and at the same time small and deep wrinkles disappear promptly. It is surprising what a change it makes in one's appearance. Get two ounces of spot from your druggist for about half a dollar, and mix this with one tablespoonful of glycerine in a half pint of water. No other wrinkle cream is necessary.

SORROWFUL—There is no question but that sores dry up the secretions of the scalp and hair, and they also fall to remove the scale which forms in a film. The way to do is to dissolve this scale and let your hair breathe. This scale can be dissolved by dissolving a teaspoonful of sugar in half a cup of water and use as a head-wash. Your scalp will be clean and it never was before, and your hair will have a silken sheen that is exquisite. There is enough sugar in a twenty-five cent package to last for many weeks.

BALDY—Your hair will absolutely stop falling and begin to grow in wonderful fashion if you will make up your own hair grower as follows: Add the contents of one one-ounce package of beta-quinol, costing 50 cents at the drug store, to a half pint of water and a hair pint of hair run. This costs less than the hair treatment already pressed upon you, and does the work. It will solve your hair problems once for all.

Glass of Salts Cleans Kidneys

If your Back hurts or Bladder bothers you, drink lots of water

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity.

The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get your pharmacist about four ounces of

Jad-Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad-Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.—Adv.
