#### Colds, Coughs and Grippe

Commonly the first symptom of a cold is a chilly feeling, accompanied by sneezing or a tickling in the throat. The most frequent causes are getting wet, cold feet, or going from hot rooms suddenly into cold ones, catching cold from contact with other persons in crowded street cars or assemblies. Frequently there is an inner cause, namely, the stagnation of the blood, caused by constipation or biliousness. One never takes cold unless constipated or exhausted, and having what we call mal-nutrition, which is attended with impoverished blood and exhaustion of nerve force. There is a continual absorption of poisons into the system, unless the entire intestinal tract is kept clear and clean as possible. For this there is nothing better than Castor Oil, or a vegetable extract of May-apple, aloes, jalap, rolled into sugar-coated pills, and sold in every drug store as Dr. Pierce's Pleasant Pills. It is the common practice of every doctor in the land to give a good purgative in any case where he cannot be sure of what drug to give. The first thing to do as every one should know is to "clean house". For the cough there is nothing better than the old Golden Medical Discovery, a botanical extract which Dr. Pierce put on the market fifty years ago. This contains no alcohol but does contain wild cherry bark, cohosh, Oregon grape root, and other botanical extracts which are not only good for the system, but check the cough, and this is the very best alternative and tonic that I know of to take for the grippe, as it offers a scientific method of treating the blood by improving the nutritive functions of the patient. The "Medical Discovery" accomplishes this by first restoring the enfeebled digestive organs, so that food—the natural tissue builder—will be digested and taken up and assimilated by the system. There is nothing better for diseases of the stomach, lungs and blood than this old remedy which every druggist keeps in liquid or tablet form.

### OMAHA BOYS IN 13TH ON WAY TO UNITED STATES

In the 13th there were superintendents, trainmasters, engineers, conductors, brakemen, switchmen, yardmasters and all the other crafts necessary for the construction, operation and maintenance of a railroad system. Prior to going across the boys trained at Camp Grant. Reaching England they were retrained by King George and soon thereafter proceeded to France, where they were divided into units, taking charge of the military railroad that was carrying troops, munitions and supplies into the war zone. It was the first railroad regiment to go into service in the war zone.
