DEALERS AND REPAIRMEN

The new Omaha radiator is now on the market. It is the result of years of study and experimentations and we believe it far excels all competitors. It contains the four long needed features:

1—Concave ends, making it non-collapsible;
2—Overlapped construction, making even, smooth edge;
3—Vertical core, making easy radiation;
4—Sectional core, making it easy to repair.

It has the straight up and down passage which is the only sure preventive of clogging, is made of the best quality radiator brass and selected fittings and is so designed as to please the eye.
