Special Presentation of **GINGHAM FROCKS**  
At **\$10**

On Display in Our Summer Dress Section—On the Second Floor

THE vogue for gingham is interpreted in the season's most attractive models as shown here in illustrations.

The qualities we looked to most are smartness and durability and these two features are emphasized in this showing.

The frocks are so different and so attractive as to style and decorative detail that but a glance at the display established the desire that not one but several should be added to one's wardrobe.

As to description—suffice to say that every style feature with those little touches of daintiness and individuality is represented—including the barrel effect skirt with surplus crossed sash; organdy embroidery shawl collar and cuffs with vestee of tucked organdy; pipings, tiny pearl buttons, deep bias frills; bustle effect skirts, long tunic, etc.

But come, see them for yourself. You'll enjoy viewing them and the values are very uncommon.
