### TODAY'S AID TO BEAUTY

Hair is by far the most conspicuous thing about us and is probably the most easily damaged by bad or careless treatment. If we are very careful in hair washing, we will have virtually no hair troubles. An especially fine shampoo for this weather, one that brings out all the natural beauty of the hair, that dissolves and entirely removes all dandruff, excess oil and dirt; can easily be used at trifling expense by simply dissolving a teaspoonful of canthrox (which you can get at any druggist's) in a cup of hot water. This makes a full cup of shampoo liquid—enough so it is easy to apply it to all the hair instead of just the top of the head. This chemically dissolves all impurities and creates a soothing, cooling lather. Rinsing leaves the scalp spotlessly clean, soft and pliant, while the hair takes on the glossy richness of natural color, also a fluffiness which makes it seem much heavier than it is. After canthrox shampoo, arranging the hair is a pleasure.—Adv.

## What Is the Best Occupation for Your Daughter

### This Article Is Addressed to the Mothers and Fathers Who Are Interested in Helping Their Daughters Select the Right Kind of Work

The picture shows a relief hour in one of the large rest rooms.

The following will give a brief account of the profession of telephone operating and of the surroundings of the young women engaged in this work.

The telephone operator pays nothing for her training, but instead she is paid while learning. She is listed as one of the employees, safeguarded under the Employees' Benefit Plan, with no expense to the employee. She also is given a vacation each year with pay.

A young woman who wishes to become a telephone operator may apply at the office of the District Traffic Chief, Room 613, New Telephone Building, 19th and Douglas Streets, for admission to the Operators' Training School.

If she is a normal, healthy, young woman, with certain necessary qualifications, she is accepted, assigned to a class in the Operators' Training School, and her name goes on the company's pay roll at once.

No previous knowledge of telephone work is required. She practices on "dummy" telephone switchboards, and after a few weeks' training she is given employment at a telephone central office that is as near her home as the requirements of the business permit. At this point she becomes a Junior operator and is assigned to a regular switchboard situated in a large, clean, airy, well-lighted central office. She does not work more than eight hours a day, and comes under the direct supervision of women only.

At luncheon time she may go to the Operators' Dining Room, which is maintained by the Company in the telephone building for the convenience of the telephone operators.

At certain periods during the day operators may retire to a comfortable rest room, where they may chat with co-workers, read books or magazines, or rest. This room is in charge of a matron.

This, briefly, is an outline of the profession of telephone operating. It is an ideal occupation for young women and it affords plenty of opportunity for rapid advancement to higher positions and higher salaries. All of the young women now holding the highest positions in any of our central offices came up from the operator's ranks.

Parents or relatives are especially invited to accompany the applicant and investigate the working conditions of Telephone operators.
