ASK INJUNCTION AGAINST OMAHA CORPORATION

Railway Commission Files Appeal in Painless Withers Dental Company Case; Alleges Violation of Law.

Lincoln, June 4.—The State Railway commission filed an appeal in the supreme court Wednesday afternoon from the judgment of the Douglas county district court in a case wherein the Painless Withers Dental Company of Omaha, composed of William Lee Withers, Harris E. Bowes, Gilbert Withers, John T. Booth and W. Skovgard are the incorporators.

The application which asks for a perpetual injunction forbidding the company to sell any more stock and for the appointment of a receiver for the company, sets out that the company was incorporated in the sum of \$100,000 October 27, 1917, and asks permission of the railway commission to sell stock of the company in this state. Application was later withdrawn pending decision of the commission.

Violated Law.
The company went ahead and sold stock, it is alleged, against the laws of the state, to Gilbert Withers, who sold same to different parties in sums varying from \$100 to \$125 per share, amounting as near as can be determined, to \$15,000. It is alleged that the stock on a basis of \$100,000 capital is not worth \$10 per share. The commission appeals from the order of the court which sustained a demurrer against a judgment in favor of the company as protection to stockholders and against the incorporators of the company.

South Side IMPROVEMENTS MADE IN UNION STOCK YARDS

Enlargements Being Rushed in Contemplation of Fall Run of Stock; New Sorting Arrangements.

The Union Stock Yards, South Side, will be enlarged to handle 2,000 more head of stock a day than is now possible. Gangs of men are at work and 190 catch pens have already been installed at scales Nos. 8 and 10.

The enlargements are being made in preparation for the usual big run of western cattle this fall. Much of the congestion during the fall run is said to have been due, not so much to the lack of pen room as to the uneconomical arrangement of pens. Plans to remedy this arrangement have been made.

Plan "Jackpots."

A new sorting arrangement for "jackpots" in front of scales has been planned, and already installed at scales No. 5 and No. 7. This arrangement is expected materially to facilitate the work, both before and after weighing.

Another plan to facilitate the work is to change the blocks of large pens into smaller pens. Taking five blocks that contain at present 107 pens, it is proposed to split them up so as to provide 200 pens. These will be known as model blocks and if they prove as practical as expected, they will be installed in other blocks.
