Dodge Engineers Scheduled to Arrive in New York Monday: Big Reception Being Arranged.

cablegram yesterday from her husband, Capt. E. E. Spetman, of the Dodge engineers, announcing that Company B, 109th engineers, sailed was sent from St. Nazaire, France, and said the engineers were sailing for New York. They should reach port Monday or Tuesday.

When "Spet" quit the office of city engineer in Council Bluffs to enter the service the day following the publication of the famous Von Bethman-Hollweg secret instructions to the German ambassador to Mexico to arrange for the invasion of the United States by Mexico and Japan, he was the reddest blooded American in town. Before noon of that day he set about helping to organize the Dodge engineers, co-operating with County Engineer Howard. He was given a lieutenant's commission, but after a year's work on the Mexican border he won his captaincy and went to France in command of a company. The story of what the Dodge engineers did on the battlefront is the story of what the 168th did, now world history.

When the Dodge engineers reach Council Bluffs another welcome paralleling Company L's reception will With them will come practically the last of 2,000 soldier boys who left Council Bluffs to lick the Huns.
