Washington, Aug. 6.—The high price of shoes was declared to be tue to excessive profits taken by every factor in the shoe production industry in a report by the federal trade commission to congress made public today. The packers were charged with having begun the pyra-miding of shoe prices by an unwarranted increase in the price of hides the supply of which they were said to control. On top of this, the tanners have taken "exceptional prowhile the shoe manufacturers have demanded an "unusual margin," and the retailers have charged prices that are "not justifiable."

The commission's report covers the four-year period from 1914 to

To show that the packers have made unwarranted increases in the price of "packer" hides, the report pointed out that the price differential between their hides and "country" hides-hides of a lower gradehas increased "far beyond the usual proportion." Charges of excessive profits against the tanner and the shoe manufacturer were said to be supported by "the high rates of return on investments" in both industries following the price increases.

"The public," said the report, "had to pay prices for shoes that not only not be justified because retail shoe dealers took too much profit but because the dealer had to pass on to the consumer the execessive profits received by butchers for hides and also the excess profits of tanners and shoe manufacturers." Proposes Relief Plan.

"Some relief from the intolerable prices paid by consumers for shoes may be had," the commission said,

"by:
"(1) A rigid enforcement of the laws against monopolistic control of

"(2) Legislation forbidding producers of hides engaging in the tanning business, and
"(3) The adoption of a device in

the distribution of shoes that will acquaint the consumer with the sellng prices of the manufacturer. While noting that because of increases in the costs of materials during the war period "prices were
