

THIS building is the twin brother of the Skinner Packing Company's general office building at Omaha's Daylight Snowwhite Independent Packing Plant.

The first floor of this building is used for garage; the second and third floors for employees dining rooms.

It is only natural that Omaha's Daylight Snowwhite Independent Packing Plant should be equipped with White Trucks and we are proud to announce, following the general policy of other great packing companies, the Skinner Packing Company has recently purchased from us a fleet of ten White Trucks, recognized as the world's best trucks for packing house purposes.
