What to Use and Avoid On Faces that Perspire

Skin to be healthy, must breathe. It also must perspire—must expel, through the pores, its share of the body's waste material. Certain creams and powders clog the pores, interfering both with elimination and breathing, especially during the heated period. If more women understood this, there would be fewer self-ruined complexions. If they would use ordinary mercolized wax instead of cosmetics they would have healthy complexions. This remarkable substance actually absorbs a bad skin, also unclogging pores. Result: The fresher, younger under-skin is permitted to breathe and to show itself. The exquisite new complexion gradually peeps out, one free from any appaarance of artificiality.

Obtain an ounce of mercolized wax from your druggist and try it. Apply nightly the results are the results and try it.

your druggist and try it. Apply nightly like cold cream for a week or two, washing it off mornings. There's nothing quite so good for an over-red, tanned or freckled face.

Miss Yates was attacked at an early hour yesterday morning at her honle, 700 South Seventh sereet. She was sleeping alone, and like Miss Volmer, was awakened by a clntch at her throat. A man, whom she thinks was a negro or a foreigner, was bending over her. She struggled violently and screamed, her cries awakening other members of the family.

The man escaped from the house through an open window. Miss Yates repeatedly struck him in the face and is certain her finger nails cut deep furrows in his skin.

She is unable to give any definite description of the assailant, beyond the fact that he was a large man. The similarity of the attacks cause the belief that he may have been the same man that attacked Miss Volmer who is still under the care of a physician.
