

Men at some times are masters of their fate; The fault, dear Brutus, is not in our stars, But in ourselves, that we are underlings. —Shakespeare.

# WOMAN'S SECTION OF THE BEE

Of all the wonders that I yet have heard, It seems to me most strange that men should fear; Seeing that death, a necessary end, Will come when it will come. —Shakespeare.

## Girls "Just Wild" Over Flying

### The "Blue Bird," Piloted By Aviator Brooks, Gives Omaha Fans a Thrill.

When the "Blue Bird" winged its way into the Heavens Friday evening it carried Virginia Ostenberg, the youngest Omaha girl who has yet flown. With W. C. Brooks as pilot she had no fears and was all on tiptoes for the start, and literally this young aviator is still "up in the air," for her only exclamation is "wonderful," when she is questioned. She soared over our fair city and tells us frankly that you must view Omaha from a high altitude to really appreciate its beauties. Away over the Happy Hollow golf links she flew and the fans who pursue the elusive white ball were "mere speck." Imagine! Calling a golf champion a speck! Such are our "flights" of fancy when we go air-planting! Virginia, who boasts of only 15 summers, has almost decided to make aeronautics her vocation so enthusiastic is she over her trip into the blue. She recognized all the familiar landmarks of Dundee and didn't lose "the place," even though she was literally treading the Milky Way. Seven flights were made during the course of the evening and many Omahans who were eager for air thrills were disappointed, for others took their places. Everyone is in love with this new and fascinating hobby that there is no doubt Miss Debutante will be driving her own plane within a short time, its mauve and blue trimmings just harmonizing with her gown. Even the society scribe has visions for her imagination is soaring through space. Air-plant parties! What could be more unique, stopping for luncheon at some wayside inn, or perhaps an evening "fly." Even a jazz band and the ailments of a country club will fade into insignificance when the guests may travel straight to the moon. The "Blue Bird" will make the next flight Sunday evening from the field on West Dodge street, and for those who long for a closer acquaintance with Mars, "all aboard!"

# FALL IS AT HAND

NOW is the time to get out your heavy clothes and have them put in shape for cool weather. You can easily make your old garments last another season by having them cleaned, or dyed, repaired, or relined.

## Dyeing---

Our Dyeing Department is in charge of one of the best dyers in the United States. We successfully dye dresses (either ripped or whole), suits, coats, sweaters, men's clothing and children's garments.

## Repairing and Altering

We employ only expert tailors and can make any repairs or alterations desired, both on men's and women's garments. We put in new linings, put on velvet collars, put in new pockets, make new edges on sleeves or pants bottoms, alter jackets, lengthen or shorten skirts, etc., for about two-thirds what the regular tailors charge.

Remember, the Pantorium is the oldest and best known cleaning and dyeing establishment in Nebraska. For over 22 years we have been "building for the future," so we can't afford to turn out inferior work.

Out-of-town people, by using the parcel post, can have the services of this big plant just as well as though they lived in the city. We have hundreds of regular customers, consisting of bankers, merchants, lawyers, doctors, etc., in the towns near Omaha. Many of them have been with us for years and years. Write for price list and any other information you wish. We pay return charges on any order to any point in the United States.

# Is Your Blood Starving For Want of Iron?

Modern Methods of Cooking and Living Have Made an Alarming Increase in Iron Deficiency in Blood of American Men and Women

Why Nuxated Iron so Quickly Builds Up Weak, Nervous, Run-Down Folks—Over 3,000,000 People Annually Taking It in This Country Alone to Increase Their Strength, Power, Energy and Endurance.

"Is your blood starving for want of iron? If you were to go without eating until you became weak, thin and emaciated, you could not do a more serious harm to yourself than when you let your blood literally starve for want of iron—iron that gives it strength and power to change food into living tissue," says Dr. James Francis Sullivan, formerly physician of Bellevue Hospital (Outdoor Dept.), New York, and the Westchester County Hospital.

"Modern methods of cooking and the rapid pace at which people of this country live has made such an alarming increase in iron deficiency in the blood of American men and women that I have often marveled at the large number of people who lack iron in the blood, and who never suspect the cause of their weak, nervous, run-down state. Lack of iron in the blood not only makes a man a physical and mental weakling, nervous, irritable, easily fatigued, but it utterly robs him of that virile force, that stamina and strength of will which are so necessary to success and power in every walk of life. It may also transform a beautiful, sweet-tempered woman into one who is cross, nervous and irritable.

"I have strongly emphasized the great necessity of physicians making blood examinations of their weak, nervous, run-down patients. Thousands of persons go on year after year suffering from physical weakness and a highly nervous condition due to lack of sufficient iron in their red blood corpuscles without ever realizing the real and true cause of their trouble. Without iron in your blood food merely passes through the body, something like corn through an oil mill with rollers so wide apart that the mill can't grind.

"For want of iron you may be an old man at thirty, dull of intellect, poor in memory, nervous, irritable and still 'run-down,' while at 40 or 50 with plenty of iron in your blood you may still be young in feeling, full of life, your whole being brimming over with vim and energy.

Which kind of man are you?

Which kind of woman are you?

"There can be no strong, healthy, beautiful women without iron and inasmuch as refining processes and modern cooking methods remove the iron of Mother Earth from so many of our most common foods this iron deficiency should be supplied by using a digestive process to transform iron into organic iron—Nuxated Iron—before they are ready to be taken up and assimilated by the human system.
