# Texas Oils Big Returns

THE PRESENT MONEY-MAKING OPPORTUNITIES ARE WORTHY OF THE SERIOUS CONSIDERA-TION OF THE MORE CAREFUL INVESTOR.

The Pullman Oil & Refining Company is operating on a business basis and makes its sales appeal to the investor who is careful in the placing of his money and demands safety, as well as large returns.

This Company is organized on a sound financial basis for the reason that ample cash resources are necessary for the assurance of success. The small company puts its eggs all in one basket and it is only by the most unusual good fortune that they pay dividends. The larger company makes a certainty of production by obtaining scattered holdings in proven territory and drilling a number of wells on these holdings. It further provides for the refining and distribution of crude oil and its by-products, for fully seventy-five per cent of all profits Blakely Promises Senin this business are made after the oil leaves the well.

Holdings

The present holdings of this company total 427 acres divided in eleven tracts. Three tracts are in the famous Desdemona gusher oil field; six tracts in the well-known Duke-Knowles, Comanche County field; one in Coleman County; and one in Fisher County. We are drilling in proven territory only and our locations are the pick of the field in which we are operating. We are now ready to close on further choice acreage.

### To Drill Ten Wells

The immediate drilling program of this company calls for ten deep wells. Our No. 1, F. M. Daniel, on the Desdemona Townsite, is now on the oil sands and will be drilled in as soon as pipe line connections are made. This well has five neighbors within a circle of 1,500 feet radius, which combined have a total production reported at over 20,000 barrels of oil a day. The Warren Wagner, alone, at a distance of some 500 feet, is rated at 8,000 barrels, so you may well see that we are

Our No. 2, F. M. Daniel, is drilling and its location at 800 yards north of No. 1, justifies the expectation of big production. The balance of the wells on the immediate program will be started at the earliest possible moment. There is safety in numbers. We are operating on a sane production program which will get satisfactory results.

#### Pipe Lines and Refinery

We will have a 3,000-barrel refinery in operation at the earliest possible moment. This refinery will be built on the unit system and provision made that its capacity may be increased at any time. Pipe lines will be built connecting production with the refinery and with large tank storage space as provided. Refining, in itself, is a tremendously profitable business and it is reasonable to expect that the first twelve months' operation should show net profits in excess of our entire proposed outstanding capital stock.

#### Conclusion

The Pullman Oil & Refining Company is a responsible organization operating on a basis that assures extraordinary profits. We are a going concern, firmly established and destined to become one of the larger Texas companies engaged in the Production, Refining and Distribution of crude oil and its by-products. It is not a catch penny company, but has real substance and is managed by men of integrity and ability. The present stock allotment is limited and in all probability will be the last. Our first well is all but finished and quick action on your part is now a necessity. Present offering at par value of \$1.00 per share; subject to advance, or balance of issue may be withdrawn without notice.

Mrs. Buley Had Suffered Twenty Years—Is Perfectly Well, Now.

"When my friends ask me what caused my wonderful improvement, just say 'Tanlac,' and they seem to understand," said Mrs. Burl Buley, residing at 521 Baxter Court, Canton, Illinois, while talking to a Tanlac representative the other day. "For the past twenty years," con-tinued Mrs. Buley, "I have suffered from acute indigestion, and when these spells came on me the pain and misery I underwent is simply more than anybody will ever know. My stomach was in such bad condition that the least thing I ate would cause me to suffer terribly afterwards. I finally got to where even a little milk and toast would cause me to have bad cramping spells, and gas would form so bad that I could hardly get a good breath. This condition kept up until was so weak and run down that I was not able to attend to my housework. I also suffered a great deal from headaches, and sometimes I would have such bad spells of it that it just seemed that my head was going to burst. I was so nervous all the time that the least thing would upset me, and I never knew what a good night's sleep was. Nothing I took in the way of medicine

"Well, the papers were having a great deal to say about Tanlac, and so many people were being benefited by using it, so I got my husband to get a bottle of it for me. The day that I commenced taking Tanlac certainly marks the turning point for me, for I began to improve before I had finished my first pottle of this wonderful medicine. Why, in little or no time I could eat just anything I wanted without suffering afterwards, and I just continued to improve until my twenty years of suffering is completely at an end. I eat things now that I haven't dared touch for years. Those awful headaches have left me, too, and I never have a sign of acute indigestion. In fact, I am perfectly well in every way, and when night comes now, I sleep like a baby for eight or nine hours. I tell everybody I meet about Tanlac. for I know it is solely responsible
