

When Copeland Plays Tonight

At Hotel Fontenelle

Music lovers will have an opportunity to hear a recital excelling in unique interest any recital ever held in Omaha.

The facts justify this emphatic statement.

Any recital by Copeland, the world's greatest pianist, is supremely important musically.

This particular recital by Copeland possesses features of extraordinary interest, scientifically as well as musically.

Copeland will play in direct comparison with reproductions of his own renditions by the so-called "miracle instrument," the

AMPICO REPRODUCING PIANO

On the Superb Knabe Grand

No other hands can duplicate the marvelous work of Copeland's fingers. The technical intricacies and delicate tonal colorings accomplished by Copeland are beyond the power of any other living

There is ONLY ONE MEANS of duplicating them with absolute EXACTNESS, and that single means is the scientific Knabe Ampico Reproducing Piano.

There is no effect possible for the most gifted fingers to accomplish which the more-than-human Knabe Ampico Reproducing Piano cannot repeat in detail. What the Knabe Ampico Reproducing Piano will actually do-and how utterly different it is from any other instrument in the world—you could not possibly understand from mere words, even if you were willing to accept our statements completely.

You must HEAR the Knabe Ampico Reproducing Piano itself to grasp the faintest significance of this scientific achievement-and to hear it reproduce Copeland's own hand playing in direct comparison with his original performances, will prove that the Knabe Ampico Reproducing Piano really represents one of the most remarkable and valuable scientific contributions of this century of many wonders.

An inexpensive and good cold cream recipe, handed down to dainty Mile. Nadje from her grandmother. was given gratis to her audience. Out came pencils, and forth came questions. Here are the directions: Render a quarter of a pound of lard. (This is done by putting the lard into a deep bowl and pouring boiling water over it. Put in ice chest over night and the lard will come to the top. Make a hole in the lard and pour off the water.)
