This we hope will be the last time that we will have to tamper with our timepieces. For although setting the clock ahead an hour during the summer months had many undeniable advantages, it had, however, as is the case with

all human affairs, some disadvantages also. On account of these latter many places did not advance their timepieces as the law ordained. The consequence was much confusion and misunderstanding. By having all our clocks agreeing, and the sultan of Bayaboo would not we hope to come back to that union that existed before this law was toward their rancherias. made.

"Hart Schaffner & Marx"

One of the reasons for our making so frequent and so emphatic an argument about Hart Schaffner & Marx clothes is that they represent the quality idea in merchandise which business men everywhere recognize as the thing people want.

Good quality in all-wool fabrics, good tailoring, good style, right fit; what more does a man want in clothes? The only point to be particular about is that when you pay for these things you get them.

As for that, Hart Schaffner and Marx guarantee it; we guarantee it; we promise more than quality material and work; we guarantee your satisfaction.

> You ought to think of them as your clothes
