

Over 2 $\frac{3}{4}$ Acres Floor Space

SKINNER PACKING COMPANY *Produce Dealers*

Here is an illustration of the new Produce and Cold Storage Building of the Skinner Packing Company, now being erected at 12th and Douglas Streets, Omaha Nebraska.

This plant will be the most modern poultry and egg plant in the world. The building is nine floors, 99x132. The basement floor is used for dry cold storage. The first floor is used as a branch house for the packing company and produce department offices. The next five floors are for cold storage. The next floor is used for chicken picking and egg candling and the top floor is used for chicken feeding.

In addition to this property, the company also owns property adjoining on the north of this building, on which will be erected in the future, a building to take care of a more extensive business in butter.

The Produce Department of the Skinner Packing Company was established over a year ago and has met with phenomenal success and is now being conducted temporarily in the old Kirschbraun Creamery building, until the new building is finished.

This department is owned by the Skinner Packing Company and we wish to impress upon shippers throughout this territory that the policy of the company is to give prompt service, the best market prices and prompt returns. If you are not already shipping to this department, write for our price lists at once.

The following letter, which was received from the President of the Omaha Poultry Association, will give you some idea of Nebraska's importance in the production of poultry and eggs and how important this industry is to Omaha and all this Missouri Valley territory.

JOHN W. WELCH, President.

ARTHUR L. EDSON, Secretary.

OMAHA POULTRY ASSOCIATION

Mr. Paul F. Skinner, Chairman of Board, Skinner Packing Company, Omaha, Neb.

Dear Mr. Skinner:

Wish to thank you for your subscription to the fund for the coming Omaha Poultry Show, to be held November 23d to 30th.

You might be interested to know that I have statistics from Mr. E. R. Danielson of the State Fair Board of Nebraska, that in poultry and eggs, alone, Nebraska had a production of over \$56,000,000 in 1917, and, of course, the growth has been steady for the last two years.

In view of the fact that the Skinner Packing Company is erecting such a modern produce plant, I thought you would be interested, but no doubt, you are already familiar with the conditions, or you would not be engaging in the business so extensively.

Your very truly,

OMAHA POULTRY ASSOCIATION.
(Signed) John W. Welch, President.

SKINNER'S POULTRY-BUTTER-EGGS

The Produce Department of the Skinner Packing Company during this last year has done a large export business, and the department exports poultry and eggs to all parts of the world and ships these goods to all points in the United States.

The company now operates, not only in the State of Nebraska, but the territory includes western Iowa, northwestern Missouri, northern Kansas, eastern Colorado, southern South Dakota and eastern Wyoming, and the volume of the poultry and egg business in this territory amounts to many millions of dollars.

As stated above, this department is owned by the Skinner Packing Company and if you desire any information on the securities of the Skinner Packing Company, we would be glad to have you mail us the attached inquiry blank and give you any information you want.
