GRAIN MARKET

Chicago Grain and Provisions.

Chicago, Nov. 18.—Fear that threatened railway freight embargoes, might include grain if the coal strike continued much longer did a good deal today to lift the price of corn. Closing quotations were firm at 14:64% c net advance, with December \$1.34% \$1.34% and May \$1.26% \$0.126% Oats finished \$6 \times coup. The provisions varying from 45c decline to a rise of 49c.

Nervousness on the part of above.

Nervousness on the part of shorts in the corn market was evident throughout the day, especially as to the December derey. The fact that receipts here had dropped from 389 carloads yesterday to 112 today forced the question of supplies into continuous notice, and during the last hait of the session in particular the chance of a sweeping embargo made bullish sentiment uppermost. Need of cars to save unsheltered wheat in the west counted further against the bears. Meanwhile, weakness of hog values failed as an offset and so, too, did a new low record for Isritish exchange. As a price making influence the excellent weather prevailing was wholly ignored.

Oats, like corn, reflected mainly the prospect of a general freight embargo.

Provisions were firmer at first in sympathy with grain, but lard eased off subsequently, owing to slackness of cash devended.
