"Please sit down," he urges the or country places could be given over to this work, and groups of working people could go there for a holiday. This plan has already been taken up by concernities so improvement on the usual beach less you're made of stone from the hotel or boarding house to which waist up, it will bring a lump to the worker goes for a summer's your throat.

Playgrounds for young children are very strongly recommended, as are playgrounds for children of "The general tells me you've been more mature age. The need for social centers is pointed out, and the work of the neighborhood house type in America cited as an example of what can be done in this field.

League of Women Voters.

"In 1919, he League of Women Voters was formed by Mrs. Carrie Chapman Catt in St. Louis. This ague is a nation-wide organiza tion, automatically taking the place of the various state suffrage assobecome enfranchised. The principal object of this organization is to raise the standard of citizenship of both men and women, so every voter shall be able to read his, or her, own ballot, speak the language of the country, and understand its aims and policies. Over its eight committees are appointed national chairmen. Mrs. Bagley heads its American citizenship committee. To meet the aims of the League of Women Voters, a new type of citi-zenship school is arising all over the country. These are working out syllabi, simple enough for the immigrant woman, for the casual voter, aiming at nothing more obtuse than information as to how to find out where her election district lies, and how to register and enroll, and, finally, they are ample enough to give a complete understanding of the theories of government, and a follow-up study of the responsibilities of citizens. A graded system of education in civics is called for. Nothing is too simple, and nothing too scholarly and abstract for the demands of the awakening woman. A significant phase of the movement is the co-operation of secondary schools and colleges in this movement.

"The woman citizen, the woman's political journal, has carried for the past two years a series of articles on civic questions, legislative standards, policies of various political parties, and news about the growth of these new citizenship schools. Several of these articles formed a book on civics written by one of the magazine's editors, Mrs. Mary Sumner Boyd, and entitled the Woman Citizen."

A President's Experience

Overstout men and women who have tried various methods for reducing weight without success will be interested in the discovery made by Mr. C. D. Stevens, President of Muskegon Boiler Works.

This gentleman found that his weight was becoming burdensome. It was seriously interfering with his health and business efficiency.

interfering with his health and business efficiency.

Happening to learn of a certain oil, he obtained some at a drug store and began using it while following simple rules. To his surprise and delight, his weight began to reduce gradually until in less than three months he had lost 35 pounds.

Mr. Stevens felt better every day and now he expresses great satisfaction at having gotten rid of the superfluous flesh. Many others, men and women, are following the korein system, which has seven simple rules and includes oil of korein, a safe, wholesome treatment. No thyroids, no salts or calomel, no tedious exercises, no starving rules; a truly pleasant and effective home self-treatment for overstoutness.

The oil of korein is now obtainable at busy drug stores everywhere. Fuch pkg. has a guarantee that weight will be reduced 10 to 60 lbs., or more, or money refunded after fair test. A brochure will be mailed free if you write to Korein Co., NL-69, Station F. New York. Show others this advertisement.

This institution is the only one in the central west with separate buildings situated in their own grounds, yet entirely distinct, and rendering it possible to classify cases. Theatre Is Scheduled

fornia, says of Samuel J. Hume, director of that theater, who will speak before the Omaha January Drama league in Omaha January 19, at 4 p. m., on the community theater movement:

"I recommend him to you on the strength of his ability as a speaker. So often men of culture and particular knowledge are not fortunate in their delivery; but Mr. Hume does not suffer this handicap. His ad-dress is engaging and captivating. Fluent and stocked with both knowledge and enthusiasm for his subject, he wins an audience completely, both for his personality as an artist and for the subject which he espouses. And my associations with him both at the little theater and at the Greek theater have convinced me, in fact, that his success in both places was due in large part to a very definite ability to make a clear and incisive address before the numerous groups that make up any healthy community theater enterprise, present-ing his and their problems in such a

Sore Eyes Lavoptik

People report QUICK results from simple witch hazel, camphor, hydras-tis, etc., as mixed in Lavoptik eye wash. The Important Thing

The Italians have a merry tale concerning a shoemaker "anxious about the shoe and caring nothing about the foot." The makers of Ground Gripper shoes are more concerned about the human foot than about the shoe.

Ground Gripper shoes are made in accordance with common sense ideas and scientific facts. The men who design Ground Gripper shoes are students of anatomy as well as shoe makers. Ground Gripper shoes induce foot health.

The Ground Gripper shoe is a Moccasin. It is flexible and responsive. The Ground Gripper shoe possesses some exclusive features. Many men competent to judge consider it the most scientific shoe ever produced. Our fitters co-operate with the makers in giving every customer just what they need.

J. L. Brandeis & Sons

take pleasure in extending to you an incitation to visit and inspect an

Exhibit of American Dyes

furnished by the

National Aniline & Chemical Company, Incorporated of New York

> to be on display on the Fourth Floor of their Main Store for the week beginning January Twelfth

HIS EXHIBIT will trace in graphic display the rise and progress of the American dyestuff industry, and illustrate its present status as compared with foreign dye production. It will include basic raw material, crudes derived therefrom, intermediates, and finished colors. Dyed textiles and fabrics will be submitted to severe tests to demonstrate fastness and wearing qualities, as compared with corresponding types of German manufacture. The exhibit should prove of interest not only to the student dyes, but to all who welcome the growth of a highly important American industry.

Exhibit of American Dyes

DURING THE WEEK, beginning January 12th, a special exhibit of American dyes, which has already been shown in several cities, will be on display on the Fourth Floor of our Main Store. The exhibit is promoted by the National Aniline and Chemical Company, Inc., for the purpose of demonstrating to the American public just what is meant by fast, American dyes. It is the first comprehensive display of what has been accomplished with this important industry during the past few years.

The obligation resting upon American manufacturers during the war was to produce quantity. The emergency needs of the government and of the textile industry demanded first attention. The building of immense plants had to go on hand in hand. Today we are producing some 84 intermediate products and over 200 different colors. Type for type, these products are as fine in quality as any ever imported.

This Exhibit is a lesson in patriotism. This Dve-Making Company has done its part. It is now for American women to do their parts

Let the women of this country, who have the last voice in the quality of the things they use and wear, insist on having the best dyes and American dyes. Whether or not the position of independence and freedom from dependence on another country shall continue rests with you. You should insist that the goods you buy shall be dyed with American dyes.

This exhibition deserves the earnest attention of both those who MAKE textiles and those who BUY them-for the question of color is far-reaching. Students and teachers will find it of special interest and will be given every opportunity to ask questions. A staff of the company's technical experts will be in attendance to explain various phases of the work.
