## Startling Experiments With Phenomena of Psychic Forces Described--With Thought Writing Projected Through Photo Plates

Remarkable Experiments of French Scientist in Human Radiations -- These 'Fluid' Emanations, or Thoughts, Make Impressions On Photo Plates--Plate Placed Against Forehead of Medium, While Selection of Meyerbeer Was Played, Resulted in Picture of Composer On the Film--Another Placed Plate On Forehead and Gazed Intently at Walking Cane, a Picture of the Stick Appearing On the Plate.

by HERWARD CARRINGTON, Ph. D.

Member of American and Royal Societies for Psychical Research.  
The question of psychic photography has perhaps been the subject of more debates than any other in the whole field of psychic investigation. Many thousands of photographs have been taken, showing normal and unaccountable markings upon the plates; but unfortunately a large part of these have been shown to be due either to normal effects on the plates or films used or to premeditated fraud and trickery on the part of the medium.

Plate No. 1--Thought Photograph Made by Prof. Fusuari, of the University of Japan.

Experiments no camera was used; the plate, wrapped in opaque paper, was placed either between the hands of the medium or against the forehead or the "solar plexus" and a definite thought was impressed upon the plate at the will of the experimenter. In all these cases, Dr. Ochowitz supplied and developed his own plates, and they were never under control of the medium except for the few moments during which she placed her hands upon them.

### Before War Experiments.

Shortly before the war, Prof. Fukurai of the University of Tokio, published a large book, giving the results of his experiments in psychic photography. (This is in Japanese, and as yet has not been translated.) So far as we can see, there was no possibility of fraud in connection with these photographs. They were taken in the presence of a number of scientific witnesses--from five to seven, usually, and no professional medium was employed.

Plate No. 2--Spirit Photograph Made by Mrs. Dupont Lee.

'Heaven') on the third plate. I will now try to impress my three fingers of the left hand upon this plate. I will impress the word 'Kin' (gold) upon the sixth plate in the pile. Upon the fifth plate, the words 'Myo Ho' were impressed, and the words 'Myo Ho' were found upon it. In another experiment the subject thought of the figure of a woman, sitting, which appeared dimly on a photographic plate held against her forehead, as shown in Plate No. 1.

Prof. James H. Hyslop, in the Proceedings of the American Society for Physical Research, has published (1914) a long account of some of the earlier experiments of Mrs. Dupont Lee in this connection, and traveled to Washington to conduct personal investigations and obtained a number of photographs which have since been taken. These were quite different in character from the above, though on some of them the same figure of Mr. Boccio is seen. On one in particular his phantasmal form is seen walking down a road, brilliantly illuminated by the moon.

## Wonderful Physical and Mental Force of Premier Clemenceau of France Is Credited to Scientific Exercising

Veteran Statesman for 18 Years With Unfailing Regularity Spent Half Hour With Trainer and Rebuilt Broken Down Constitution--'Tiger' Nearly 80 Years Old but Passed Through Grueling Months of Peace Conference Without Rest, While Younger Members Collapsed--Works 17 Hours a Day and Will Be Presidential Candidate.

By EDOUARD LEROY, (Private Trainer to Premier Since 1917. Formerly French Cavalry Officer.) Paris, Jan. 10.--There is no mystery about the source of M. Clemenceau's astonishing physical and mental force. For nearly 18 years, the veteran statesman, under my direction, has taken a half hour's scientific exercise every morning with unfailing regularity. The result, one that any man with a fundamentally sound constitution could easily duplicate in his own person, is that France's Premier, at nearly 80 years of age, has set a world's record of endurance, both mental and physical, and a record scarcely approached in history.

The "Tiger" is the most perfect example imaginable of what simple, scientific habits of life can accomplish in the upbuilding and conservation of human energy. Eighteen years ago, when M. Clemenceau retained my services as a health expert, he was a broken and aged man, worn out with the rigors of a life passed in unceasing mental and physical activity. He was semi-invalid, suffering from chronic dyspepsia which had reduced him to a starvation diet. What little he dared to eat he only managed to assimilate by the use of powerful artificial digestives. Long years of sedentary pursuits, under tremendous nervous tension had brought on a condition of physical atrophy.

He placed a plate upon his own forehead and looked at a walking stick for some minutes in a red light. On the plate was found the image of the stick. This writer in detailing some of his remarkable results says: "As regards photos of emotions, it is possible to show that the brain emits fluid according to the strength of the sentiments present. Passion, anger, rage produce rays emitted in a boiling state. When a man being emits a thought, it makes the brain vibrate and illuminates the phosphorus therein contained. These rays are projected outward. When thought is concentrated on a mental form, this form is susceptible of reproduction upon the sensitive film. A revolution in science will soon manifest itself, and the human rays (these newly discovered V-rays) shine forth pure and luminous to the world."

Dr. Baraduc of Paris also conducted a number of very interesting experiments in this connection, with specially sensitized plates, and apparently succeeded in directly photographing thoughts by the aid of a camera. In this case the swirls or vortices of the ether were directly caught upon the plate and photographed. A number of these have been reproduced in the past--illustrating different types of thoughts or emotions emitted by the sensitive subject--usually in hypnotic trance. Similar experiments have

who, in his lifetime, was well known as a successful physician in Washington. This picture is so curious that it certainly deserves consideration upon any theory. Whether or not these things can be taken seriously depends upon the mind of the investigator; but here at least is the photograph, which needs to be accounted for satisfactorily, whatever it may actually represent.

### Shows Large Group.

Another photograph showed a large group of people, many of them quite disproportionate, being relatively too tall or too short for others, yet overlapping each other in a singular and interesting manner (and which I have been assured by expert photographers would be extremely difficult to reproduce photographically.) It was taken and developed by Mrs. Dupont Lee herself. In this case, no camera was used at all. The plate was bound to her forehead and left there two hours.

Another experiment resulted in the figure of a known man, holding his hat. He is the late Mr. Boccio--well known to Mrs. Lee in life. This plate, we are told, was held in the hands of Mrs. Lee and Dr. R., the well known physician above mentioned, and developed by them at once--with the result that this figure was found upon the plate. It was held in their hands in the dark for about half an hour--of course, no camera being used. The so-called "photograph" looks strikingly like a drawing; but even if it may be said to have been developed as reported, and whatever we may think of them, we cannot bring the charge of conscious fraud in this case, without implicating the two principals themselves--which seems hardly possible under the circumstances.

Prof. James H. Hyslop, in the Proceedings of the American Society for Physical Research, has published (1914) a long account of some of the earlier experiments of Mrs. Dupont Lee in this connection, and traveled to Washington to conduct personal investigations and obtained a number of photographs which have since been taken. These were quite different in character from the above, though on some of them the same figure of Mr. Boccio is seen. On one in particular his phantasmal form is seen walking down a road, brilliantly illuminated by the moon.

## Tobacco Habit Easily Conquered

A New Yorker of wide experience has written a book telling how the tobacco or snuff habit may be entirely and completely banished in three days with delightful results. The author, Edward J. Woods, P. H. D., of P. N. New York, will mail his book free on request.

with a single preoccupation in life; Work. That is his sole ambition and delight. Anything that will give him strength to carry on his labors he will keep at any price. Convinced of the value of exercise and the simple diet, Clemenceau has made them part of his personal creed.

Stands Grueling Strain. Thanks to them he is today the only member of the "big five" who passed through the grueling months of mental strain and nervous tension attendant on the mission of peacemaking without a single day's rest or recreation. Yet he is by far the oldest of the "five." The nerve-racking siege, which ended in the complete breakdown of President Wilson and drove every other member of the supreme council at one time, another to seek relief in week-end trips to the country at frequent intervals, left the "Father of the Victory" unshaken either physically or mentally.

Shames Labor Agitators. Since M. Clemenceau became prime minister of France he has never missed his health routine excepting during his visits to the front and during the period when he was suffering from the wounds in his shoulder. He declares he will persist to the very end of his days the system to which he believes he owes his life.

## Yellow Mustard for Cold in Chest

When that tightness appears in your chest and the sharp pains signify an inflammation, you need yellow mustard. Mustard plasters are all right--in fact they're fine--but Begy's Mustard, made of yellow mustard and other pain destroyers, is cleaner, quicker and much more effective.

Not every man has the force of mind of M. Clemenceau. Few individuals, in fact, will adhere for a period of years to the simple regime which is within reach of every man, fundamentally sound, who seeks the road to health. The indomitable determination of Clemenceau triumphed.  
Day in and day out he met me on the dot of 8 o'clock stripped to the skin, and went through the familiar bodily contortions and pulley exercises which every schoolboy knows. He missed neither Sunday or holiday. Only downright illness or urgent state business interfered with his health program.  
Improves Second Year. During the first year an ordinary man would have lost all faith and given himself over to the forces of disease. There was scarcely any improvement noticeable. The second year, however, began to bear fruit. The "Tiger's" appetite began to show some slight improvement and his muscles, until then flabby and shapeless, became, slowly but perceptibly, more rounded and firm.  
It was not, however, until the completion of the fourth year of treatment that a radical cure could be pronounced. From that time on there was no further trouble beyond an occasional restless night or short fits of indigestion.  
But the treatments were not abandoned. The diet was not relinquished. The "Tiger" is a man

## How You Can Have "Naturally Curly" Hair

If you will forewear the curling iron and follow the simple plan here suggested, you will be surprised beyond words to see not only the beautiful curls, but the soft fluffiness and luster, your hair will acquire. The plan--to apply to the hair before styling, a little pure salicylic acid in liquid form, using a clean tooth brush for the purpose. The most effective way to do this is to use a brush, maintaining each of them separately from root to tip.

## BETTER THAN CALOMEL

Thousands Have Discovered Dr. Edwards' Olive Tablets are a Harmless Substitute  
Dr. Edwards' Olive Tablets--the substitute for calomel--are a mild but sure laxative, and their effect on the liver is almost instantaneous. These little olive-colored tablets are the result of Dr. Edwards' determination not to treat liver and bowel complaints with calomel. The pleasant little tablets do the good that calomel does, but have no bad after effects. They don't injure the teeth like strong liquids or calomel. They take hold of the trouble and quickly correct it. Why cure the liver at the expense of the teeth? Calomel sometimes plays havoc with the gums. So do strong liquids. It is best not to take calomel. Let Dr. Edwards' Olive Tablets take its place.

## Adler-i-ka Again!

"After using Adler-i-ka I am entirely cured of chronic bowel trouble. I can eat good and work every day. My neighbor is also using it with wonderful results." (Signed) M. SHERMAN, Chicago. Adler-i-ka flushes BOTH upper and lower bowel so completely it relieves ANY CASE gas on the stomach or sour stomach. Removes a surprising amount of foul, decaying matter from the alimentary canal (which is poisoned six or a week for months). Often CURE'S constipation. Prevents appendicitis. The INSTANT pleasant action of Adler-i-ka astonishes both doctors and patients. It is a mixture of buckthorn, cascara, glycerine and nine other simple ingredients. Sherman & McConnell Drug Co.

## Women Need Swamp-Root

Thousands of women have kidney and bladder trouble and never suspect it. Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.  
If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.  
Pain in the back, headache, loss of ambition, nervousness, are oftentimes symptoms of kidney trouble. Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions. Get a medium or large size bottle (immediately from any drug store). However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention the Omaha Sunday Bee.
